Periklean Athens And Its Legacy Problems And Perspectives:

Periklean Athens and Its Legacy Judith M. Barringer, Jeffrey M. Hurwit, Jerome Jordan Pollitt, 2005-08-01 The late fifth century BC was the golden age of ancient Athens Under the leadership of the renowned soldier statesman Perikles Athenians began rebuilding the Akropolis where they created the still awe inspiring Parthenon Athenians also reached a zenith of artistic achievement in sculpture vase painting and architecture which provided continuing inspiration for many succeeding generations The specially commissioned essays in this volume offer a fresh innovative panorama of the art architecture history culture and influence of Periklean Athens Written by leading experts in the field the articles cover a wide range of topics including An evaluation of Perikles military leadership during the early stages of the Peloponnesian War Iconographical and iconological studies of vase paintings wall paintings and sculpture Explorations of the Parthenon and other monuments of the Athenian Akropolis The legacy of Periklean Athens and its influence upon later art Assessments of the modern reception of the Akropolis As a whole this collection of essays proves that even a well explored field such as Periklean Athens can yield new treasures when mined by perceptive and seasoned investigators *Athens and Athenian Democracy* Robin Osborne, 2010-05-06 This book constructs a distinctive view of classical Athens a view which takes seriously the evidence of archaeology and of art history *Handbook of Greek Sculpture* Olga Palagia, 2019-07-22 The Handbook of Greek Sculpture aims to provide a detailed examination of current research and directions in the field Bringing together an international cast of contributors from Greece Italy France Great Britain Germany and the United States the volume incorporates new areas of research such as the sculptures of Messene and Macedonia sculpture in Roman Greece and the contribution of Greek sculptors in Rome as well as important aspects of Greek sculpture like techniques and patronage The written sources literary and epigraphical are explored in dedicated chapters as are function and iconography and the reception of Greek sculpture in modern Europe Inspired by recent exhibitions on Lysippos and Praxiteles the book also revisits the style and the personal contributions of the great masters *Greek Theatre in the Fourth Century BC* Eric Csapo, Hans Rupprecht Goette, J. Richard Green, Peter Wilson, 2014-08-22 Age old scholarly dogma holds that the death of serious theatre went hand in hand with the death of the city state and that the fourth century BC ushered in an era of theatrical mediocrity offering shallow entertainment to a depoliticised citizenry The traditional view of fourth century culture is encouraged and sustained by the absence of dramatic texts in anything more than fragments Until recently little attention was paid to an enormous array of non literary evidence attesting not only the sustained vibrancy of theatrical culture but a huge expansion of theatre throughout and even beyond the Greek world Epigraphic historiographic iconographic and archaeological evidence indicates that the fourth century BC was an age of exponential growth in theatre It saw the construction of permanent stone theatres across and beyond the Mediterranean world the addition of theatrical events to existing festivals the creation of entirely new contexts for drama and vast investment both public and private in all areas of

what was rapidly becoming a major industry This is the first book to explore all the evidence for fourth century ancient theatre its architecture drama dissemination staging reception politics social impact finance and memorialisation

Figuring Death in Classical Athens Emily Clifford, 2025-02-12 Figuring Death in Classical Athens puts art and literature in conversation to explore how ancient Athenians grappled with the uncertainties of death How did objects and texts generate thinking about what death is and might be like Were Athenians aware of the imaginative frameworks that underpinned their thinking Did they worry not just about death but whether they could figure it out Death in the ancient world has long been a subject of interest Studies abound that examine its social and ideological dimensions funerary practices and changing attitudes and beliefs This book takes a fresh approach cutting across sub disciplines art text philosophy and so on to build a picture of how ancient art and literature got their audiences thinking thinking not just about death but about its knowability Whether in the theatre at the symposium or on the Acropolis representations of death challenged Athenians by presenting problems of exteriority how can the living know what dying might be like and particularity can one person's experience hold for another is death truly a leveller The material covered is wide ranging Unlike other studies which often focus on either art or text and on one category of objects or one literary genre the book pulls together exemplary texts and objects including Plato drinking cups Sophocles temple sculpture and Thucydides and makes each accessible to readers from multiple sub disciplines and indeed from beyond Classics It will be critical reading for those interested in ancient attitudes to death as well as those interested in cultural imagination and intellectual history As a multi media study it will appeal to those working on ancient image and text and their intersection and more broadly to those in other disciplines working on visibility mediality materiality and culturally situated ideas

Commemorating Classical Battles Brandon Braun, 2023-07-15 This is a study of the commemoration of Classical Greek battles approaching monuments and other mnemonic practices as vital elements in the creation and curation of memories It analyzes the diachronic development of battlefield sanctuary and city spaces as evidenced by archaeological remains and ancient literary sources In addition it explores the experience of the commemorative spaces through the application of theories of space phenomenology and social memory Following a biographical approach the commemoration of each battle is organized into stages of initial commemoration official monumentalization memory curation memory lapse and reception The research has led to several conclusions While the commemoration of each battle can be divided into stages these stages are not always discrete There is variation in the types of commemorations within the stages dependent on time surrounding space and the parties involved Single commemorations can resonate differently with multiple audiences The processes within the stage of memory curation lead to the subsequent lapse The final stage of commemoration for each battle begins with the rediscovery of ancient monuments and continues to this day The battles of Marathon Leuktra and Chaironeia are case studies for three reasons First they effectively span the period of Classical Greece Marathon in 490 BCE to Chaironeia in 338 BCE Secondly these

battles had different participants thus allowing a variety of perspectives of both the victorious and the defeated Lastly these were battles that left lasting impacts in the material and literary record making their commemoration relevant not only in antiquity but also in the modern world
