posts British Journal of Neurosurgery A Christian from Egypt: Life Story of a Neurosurgeon Pursuing the Dreams for Quintuple Certifications RAMSIS F. GHALLY MD FACS,2015-01-23 This book is my life story as a Coptic Christian raised in Egypt Where no one from my family has ever moved away for thousands of years through the rise and falls of ancient pharaohs and deep roots of ancient Christianity It is also the story of my parents raising 10 children since 1953 in an environment of extreme poverty where resources and opportunities were limited with unrelenting prejudice towards Christian minorities So I came to the United States the land of opportunity and became a prominent American neurosurgeon among the only 4000 active nationwide and the only one nationally and internationally to achieve five board certifications in five acknowledged medical disciplines I continue to practice and serve the mission set before me My home land was once prosperous and rich in history Over the centuries it joined the downfall of the majority of the developing countries of the world through its economic crises and injustices to many It was the land for the fathers of early Christians and the foundation for worldwide Christians Now the Coptic Christians are considered a minority constituting a mere 10% of the population and are joining the exodus of ancient Christians from their native African continent This book chronicles my journey from the land of history the land of my birth to the land of opportunity America It outlines the socioeconomic and political changes that Egypt has seen over the last century It is my hope that others may find inspiration and understanding of my culture through reading this book I owe it all to Christ the Lord my cherished parents my family and friends my teachers my mentors and especially my beloved patients **Summary of Myron L. Rolle's The 2% Way** Everest Media,2022-08-08T22:59:00Z

Please note This is a companion version not the original book Sample Book Insights 1 The 2% Way is a system that will allow you to steadily improve yourself But this philosophy has a deeper component You must first understand what you want to achieve and why you want to achieve it This requires examining your foundations 2 I visit the statue of Pompey an enslaved warrior who led a rebellion on the seaside bluff overlooking the Atlantic I like to imagine my parents running beneath the shadow of the cross plumes of red dust rising beneath their feet 3 I grew up in the Bahamas and Christ was present in my life there In the Bahamas Christ drives our social patterns and religion is not shied away from 4 The car made it down the dark rainy road and everyone in the car prayed to God for every ounce of help he could give them They made it home safely in faith

Global Neurosurgery Robert J. Dempsey,2023-09-26 During his training neurosurgeon Robert J Dempsey M D was told that global health was something for infectious diseases and not possible in super specialties This is the story of questioning that belief of addressing a massive need by working in the areas of need going to numerous ministers of health worldwide and showing them that with the training of even a few neurosurgeons we can complete a trauma system in their country The result is now we can also provide care for cancer stroke and congenital defects of newborn children where it was previously impossible In 2015 the Lancet Commission s report predicted over the next few years 47 million unnecessary deaths worldwide due to the lack of essential surgeries This book relates the importance of rectifying that ongoing tragedy

and more importantly the humanizing influences that such a journey has had on a super specialist working with the people of greatest need It concludes that in spite of massive need the present situation is actually very hopeful as we have shifted the focus of global health from service alone to partnered teaching leading us now to self sustaining systems of care delivered for and by the people in the regions of need Global Neurosurgery covers the thought provoking and often frightening lessons learned over four decades of neurosurgical involvement in global health working from a period when little or none existed to the present state of specialized healthcare in the area of need This process starts in the U S and then addresses health disparity on four continents and now on U S tribal reservations It emphasizes the importance of first listening then partnering with government medical societies universities and private foundations and most importantly learning from mistakes The programs developed allow the recipients of the care to take over the training so that it becomes about them and their patients in their home lands It will appeal to a wide audience because its stories explain actual worldwide health conditions while giving an insight valuable to the professional or lay person into the experiences and operating rooms of a neurosurgeon working under very difficult conditions
