## **New Age Globalization Meaning And Metaphors:**

**New Age Globalization** A. Ahmad, 2013-07-03 Using the frameworks of systems theory modernization and the world system New Age Globalization presents a composite multilevel multidirectional picture of globalization informed by eight different but interdependent subsystems      **Revisiting Metaphors in International Relations Theory** Michael P.

Marks, 2018-01-08 This book presents an analysis of how metaphors are essential elements in the study of international relations It acknowledges the fact that theory and practice in international relations often rest on common metaphorical concepts which have implications for the ways people around the world pursue their lives Because of the increased attention metaphors have received as integral elements in political discourse there is a need to investigate metaphorical concepts that are not neutral in their implications for understanding international relations Inasmuch as government policy is shaped by metaphorical concepts that originate in the academic realm and given that scholarly works are therefore partially involved in inspiring policy the author subjects a range of metaphors in international relations theory to critical interrogation      **New**

**Age Globalization** A. Ahmad, 2013-07-03 Using the frameworks of systems theory modernization and the world system New Age Globalization presents a composite multilevel multidirectional picture of globalization informed by eight different but interdependent subsystems      *Shape-Shifting Capital* George González, 2015-05-20 Shape Shifting Capital Spiritual

Management Critical Theory and the Ethnographic Project is positioned at the intersection of anthropology critical theory and philosophy of religion First González explores the phenomena of workplace spirituality in a language that is accessible to a general readership Taking contemporary trends in organizational management as a case study he argues by way of a detailed ethnographic study of practitioners of workplace spirituality that the conceptual and institutional boundaries between religion science and capitalism are being redrawn by theologized management appropriations of tropes borrowed from creativity theory and quantum mechanics Second González makes a case for a critical anthropology of religion that combines existential concerns for biography and intentionality with poststructuralist concerns for power arguing that the ways in which the personalization of metaphor bridges personal and social histories also helps bring about broader epistemic shifts in society Finally in a postsecular age in which capitalism itself is explicitly and confidently spiritual González suggests that it is imperative to reorient our critical energies towards a present day evaluation of postmodern capitalism's boundary blurring González further argues that the kind of existential deconstruction performed by what he calls existential archeology can serve the needs of any social criticism of neoliberal religion and corporate spirituality      **The Future of Leadership**

**Making Waves** William G. Martin,2015-12-03 Making Waves unearths the successive worldwide waves of revolts rebellions and revolutions that have shaken and remade the world from the eighteenth century to the present It

challenges us to rethink not only our limited conceptions of social movements but the very character and possibilities of social movements. The authors show how successive outbursts of global social protest have undermined world capitalist orders and through both their successes and their failures provided the basis for long periods of stable capitalist rule across all the zones of the world economy. The surprises start in the Age of Revolution when the antisystemic wave of slave revolts that led to the Haitian Revolution is related to the systemic effects of their combination with the U S and French Revolutions. The analysis comes up to the present when a wave of post 1989 movements points to quite divergent futures based as in the past on the search for alternatives to communities organized by capital accumulation, nation states and the accelerating commodification and fragmentation of human needs, identities and desires.
