Academic Framework for 21st-Century Schooling: Promoting Global Peace and Harmony Mukhopadhyay, Marmar,Kundu, Arnab,2023-10-16 In an era fraught with existential threats Academic Framework for 21st Century Schooling Promoting Global Peace and Harmony answers the urgent call for a new path forward The UN Secretary General s recent address echoing decades of warnings from UNESCO has underscored the dire state of our world Global warming pollution terrorism unchecked population growth discrimination refugee migration consumerism and the ominous specter of weapons of mass destruction loom large in an age marked by nationalism and imperialism The very fabric of human existence is unraveling and even the UN s well intentioned MDG and SDG initiatives are in jeopardy This book authored by esteemed scholars proposes a transformation of global education as the antidote to this crisis It champions the cultivation of a fresh generation with essential attributes like critical thinking empathy respect for diversity and a profound sense of global responsibility Schools are envisioned as the crucible for shaping these future citizens At its core this book offers a well founded academic framework for global peace and harmony education addressing the intricacies of 21st century schooling curriculum transformation global best practices and the vision of happy schooling It is a clarion call to scholars and educators to lead the way toward a world where peace and harmony are not just ideals but the very foundation upon which humanity thrives Our world and future generations depend on this transformative journey one we must embark upon without delay

Doctoral Education for the Knowledge Society Jung Cheol

Shin, Barbara M. Kehm, Glen A. Jones, 2018-09-24 This book explores and compares the systems of doctoral education in twelve higher education systems consisting of four systems in East Asia four in Europe and four Anglo American systems The emphasis placed on doctoral education and training has increased dramatically in many higher education systems in response to the global competition for highly skilled human resources to serve the needs of knowledge societies Doctoral education is a key element within the research and development infrastructure and doctoral students support university research and represent the next generation of the professoriate While doctoral education has received considerable attention within national higher education systems there has been surprisingly little international or comparative research on the structure of doctoral education and the nature of contemporary reforms *The Purposes, Practices, and Professionalism of Teacher Reflectivity* Edward G. Pultorak, 2010-03-16 Very little information about the impact of reflection on teacher performance teacher retention and student learning is available in teacher preparation programs This book provides practical and research based chapters that offer greater clarity about the particular kinds of reflection that matter and avoids talking about teacher reflection generically which implies that all kinds of reflection are of equal value This book addresses five very pertinent concepts 1 teacher reflectivity in theory and research 2 teacher reflectivity in teacher education programs 3 teacher reflectivity with teacher candidates 4 teacher reflectivity in schools and classrooms and 5 teacher reflectivity and international perspectives *America's Children* , 2009
