Daniel VanHorn, E. Bruce Goldstein

New Coglab With Cengage Learning Support For Cognitive Psychology:

Cognition Stephen K. Reed, 2010 Dr Stephen Reed's Ninth Edition of COGNITION THEORIES AND APPLICATIONS focuses on the theories that underlie cognitive phenomena as well as empirical data that establishes a traditional information processing approach to cognitive psychology. This structure allows undergraduates to discover the direct relevance of cognitive psychology to many of their daily activities. The text incorporates unparalleled scholarship in a distinctive clear voice that allows for the emphasis of both contemporary and classical research through real life examples and experiments. Revised and updated throughout to maintain a high degree of currency and accuracy, content reflects the ever evolving field and is made relevant to students' lives through the inclusion of popular articles from well known magazines and newspapers. As a result of its adherence to three criteria, the material must make an important contribution to cognitive psychology, be accessible, and be both understandable and interesting. The text is an invaluable tool in learning cognitive psychology.

Writing with Style Lenore T. Szuchman, 2001-08-03 This accessible and invaluable workbook style reference guide will help your students smooth the transition from writing for composition classes to writing for psychology classes. Author Lenore T. Szuchman quickly and succinctly provides the basics of APA style in WRITING WITH STYLE. Szuchman's years of experience teaching writing intensive courses give her an inside track on the trouble spots students often encounter when writing papers and dealing with APA style. The unique workbook format offers both a quick reference to APA style and interactive exercises that give students a chance to practice what they've learned. They'll be encouraged to use already published articles as models so they're introduced to journal sources in a nonthreatening way. Szuchman pinpoints the kinds of errors that are often made followed by suggested solutions. **Bundle** E. Bruce Goldstein, Greg Francis, William A.
