**Doctoral Education for the Knowledge Society** Jung Cheol

Shin, Barbara M. Kehm, Glen A. Jones, 2018-09-24 This book explores and compares the systems of doctoral education in twelve higher education systems consisting of four systems in East Asia four in Europe and four Anglo American systems The emphasis placed on doctoral education and training has increased dramatically in many higher education systems in response to the global competition for highly skilled human resources to serve the needs of knowledge societies Doctoral education is a key element within the research and development infrastructure and doctoral students support university research and represent the next generation of the professoriate While doctoral education has received considerable attention within national higher education systems there has been surprisingly little international or comparative research on the structure of doctoral education and the nature of contemporary reforms     *The Purposes, Practices, and Professionalism of Teacher Reflectivity* Edward G. Pultorak, 2010-03-16 Very little information about the impact of reflection on teacher performance teacher retention and student learning is available in teacher preparation programs This book provides practical and research based chapters that offer greater clarity about the particular kinds of reflection that matter and avoids talking about teacher reflection generically which implies that all kinds of reflection are of equal value This book addresses five very pertinent concepts 1 teacher reflectivity in theory and research 2 teacher reflectivity in teacher education programs 3 teacher reflectivity with teacher candidates 4 teacher reflectivity in schools and classrooms and 5 teacher reflectivity and international perspectives     *America's Children* , 2009
