Naturalists At Sea Scientific Travellers From Dampier To Darwin Glyn Williams:

Naturalists at Sea Glyn Williams, 2013-10-22 DIV On the great Pacific discovery expeditions of the long eighteenth century naturalists for the first time were commonly found aboard ships sailing forth from European ports Lured by intoxicating opportunities to discover exotic and perhaps lucrative flora and fauna unknown at home these men set out eagerly to collect and catalogue study and document an uncharted natural world div DIV div DIV This enthralling book is the first to describe the adventures and misadventures discoveries and dangers of this devoted and sometimes eccentric band of explorer scholars Their individual experiences are uniquely their own but together their stories offer a new perspective on the extraordinary era of Pacific exploration and the achievements of an audacious generation of naturalists Historian Glyn Williams illuminates the naturalist s lot aboard ship where danger alternated with boredom and quarrels with the ship s commander were the norm Nor did the naturalist s difficulties end upon returning home where recognition for years of work often proved elusive Peopled with wonderful characters and major figures of Enlightenment science among them Louis Antoine de Bouganville Joseph Banks John Reinhold Forster Captain Cook and Charles Darwin this book is a gripping account of a small group of scientific travelers whose voyages of discovery were to change perceptions of the natural world div

Johann Reinhold Forster and the Making of Natural History on Cook's Second Voyage, 1772-1775 Anne Mariss, 2019-09-09 James Cook s voyages of exploration are a turning point not only in the history of the British Empire but also in the history of science and exploration of the Pacific The last decades have seen a wide ranging scholarly interest in Cook s voyages focusing on their impact on European and Polynesian societies their scientific results and their protagonists such as Cook himself or the nobleman Joseph Banks who took part in Cook s first voyage of exploration This book examines the hitherto underestimated role of the German scholar Johann Reinhold Forster who together with his son Georg Forster accompanied Cook on his second voyage of exploration 1772 1775 as a principal naturalist For a long time the German traveler has remained a rather shadowy figure of Cook s voyages of exploration and has only attracted scholarly attention occasionally Focusing on the making of knowledge onboard the ship and the islands where it made landfall the study provides a historical reappraisal of Forster s scientific performance as a leading naturalist of his time By examining Forster s Resolution Journal Anne Mariss takes a microhistorical approach toward the making of natural history knowledge during the expedition to the Pacific Mariss unveils the difficulties the traveling naturalists encountered while collecting describing classifying and painting the natural world Her study brings to light the contribution of the various actors who were involved in this undertaking such as the scientific assistants sailors officers and the local actors of the Pacific world **Captain Cook and the Pacific** John McAleer, Nigel Rigby, 2017-01-01 British Royal Navy Captain James Cook s voyages of exploration across and around the Pacific Ocean were a marvel of maritime achievement and provided the first accurate map of the Pacific The expeditions answered key scientific economic and geographic questions and inspired some of the most influential

images of the Pacific made by Europeans Now readers can immerse themselves in the adventure through the collections of London's National Maritime Museum which illuminate every aspect of the voyages oil paintings of lush landscapes scientific and navigational instruments ship plans globes charts and maps rare books and manuscripts coins and medals ethnographic material and personal effects Each artifact holds a story that sheds light on Captain Cook the crews he commanded and the effort's impact on world history Showcasing one of the richest resources of Cook related material in the world this publication invites readers to engage with the extraordinary voyages manifested in material culture and their continuing significance today

Pacific Exploration Nigel Rigby, Pieter van der Merwe, Glyn Williams, 2018-09-06 Captain Cook is generally acknowledged as the first great European scientific explorer His voyage of exploration to the Pacific in HM bark Endeavour commencing in 1768 lasted almost three years recorded thousands of miles of uncharted lands and seas including New Zealand the east coast of Australia and many Pacific islands and tested all Cook's skills as a navigator seaman and leader His voyages were among the first to take civilian scientists notably Sir Joseph Banks and they revealed to European eyes the mysterious and exotic lands peoples flora and fauna of the Pacific never before seen But while Cook understandably dominates the story of 18th century Pacific exploration the achievements of those who followed him on many voyages of science and exploration into the Pacific have been neglected and deprived of the greater attention they deserve Correcting this imbalance Pacific Exploration explores the European voyages that continued Cook's work not only of charting but also starting to exploit and control the Pacific These voyages by William Bligh George Vancouver Matthew Flinders Malaspina Lap rouse and Arthur Phillip span a period that saw Britain becoming the world's leading maritime power a situation well in place by the time that Charles Darwin's voyage in Fitzroy's Beagle laid the basis of even greater understanding of the development of life on earth Recounting and illustrating these achievements and legacies using fascinating text and beautiful illustrations and artworks from the period this book explores topics of scientific discovery engagement with indigenous peoples the use of shipboard artists and scientists the growing professionalism of the hydrographic service the vessels used and the colonial commercial and imperial contexts of the voyages

Wild Sea Joy McCann, 2019-04-25 This bracing history charts the myths the exploration and the inhabitants of the all too real and wild circumpolar ocean to our south The Sydney Morning Herald Pick of the Week Unlike the Pacific Atlantic Indian and Arctic Oceans with their long maritime histories little is known about the Southern Ocean This book takes readers beyond the familiar heroic narratives of polar exploration to explore the nature of this stormy circumpolar ocean and its place in Western and Indigenous histories Drawing from a vast archive of charts and maps sea captains journals whalers log books missionaries correspondence voyagers letters scientific reports stories myths and her own experiences Joy McCann embarks on a voyage of discovery across its surfaces and into its depths revealing its distinctive physical and biological processes as well as the people species events and ideas that have shaped our perceptions of it The result is both a global story of changing scientific knowledge about oceans and their vulnerability to human actions
