Complex Art Conservation and Preservation Problems Paul-Bernhard Eipper, 2023-09-13 In this book for the first time an examination of Egon Schiele's general painting technique is carried out The main case study for this comprehensive investigation is the painting Stadtende Huserbogen III 1918 one of Egon Schiele's last works which is housed at Universalmuseum Joanneum Graz Austria In this book the conservation campaign is detailed uncovering portrait sketches integrated and painted over in the painting unmasking the signature as a forgery and recognising the frame as the original decorative frame The research in the years following the conservation is detailed discussing that among other pigments cadmium sulphide was confirmed in the paint material which will influence subsequent conservation measures for the painting The book's examination continues with the complex interactions between environment and object that were also addressed in recently completed EU projects concluding that continuously gained knowledge about external influences and storage materials used will help to adapt further measures to the painting as it continues to degrade

Photography and Other Media in the Nineteenth Century Nicoletta Leonardi, Simone Natale, 2018-02-05 In this volume leading scholars of photography and media examine photography's vital role in the evolution of media and communication in the nineteenth century In the first half of the nineteenth century the introduction of telegraphy the development of a cheaper and more reliable postal service the rise of the mass circulation press and the emergence of the railway dramatically changed the way people communicated and experienced time and space Concurrently photography developed as a medium that changed how images were produced and circulated Yet for the most part photography of the era is studied outside the field of media

history The contributors to this volume challenge those established disciplinary boundaries as they programmatically explore the intersections of photography and new media during a period of fast paced change Their essays look at the emergence and early history of photography in the context of broader changes in the history of communications the role of the nascent photographic press in photography s infancy and the development of photographic techniques as part of a broader media culture that included the mass consumed novel sound recording and cinema Featuring essays by noteworthy historians in photography and media history this discipline shifting examination of the communication revolution of the nineteenth century is an essential addition to the field of media studies In addition to the editors contributors to this volume are Geoffrey Batchen Geoffrey Belknap Lynn Berger Jan von Brevern Anthony Enns Andr Gaudreault Lisa Gitelman David Henkin Erkki Huhtamo Philippe Marion Peppino Ortoleva Steffen Siegel Richard Taws and Kim Timby

Photography Mary Warner Marien, 2006 Each of the eight chapters takes a period of up to forty years and examines the medium through the lenses of art science social science travel war fashion the mass media and individual practitioners Back Cover
