Navigating Complexity In International Development Facilitating Sustainable Change At Scale:

Navigating Complexity in International Development Danny Burns, Stuart Worsley, 2015 Action Learning and Action Research Ortrun Zuber-Skerritt, Lesley Wood, 2019-03-11 Action Learning and Action Research deepens understanding and contributes to new knowledge about the theory practice and processes of Action Learning AL and Action Research It clarifies what constitutes AL AR in its many forms and what it is not *The Project in International Development* Caitlin Scott, 2023-06-26 The project has become fundamental to international development and humanitarian practice playing a key role in defining objectives funding streams and ultimately determining what success looks like This book provides a much needed overview of the project in international development practice guiding the reader through the latest theoretical debates and exploring the core tools and stages of planning and design The book starts with an overview of the role of the project through development history before taking the reader through the stages of a standard project management cycle Each chapter introduces the stage the most common tools used to support that phase of planning and the critical debates that exist around it with examples to illustrate discussions from around the world and a range of development fields The book explores the challenges to working effectively in contemporary aid contexts including the role of politics and the pressures wrought by the demands to demonstrate quantified results Throughout the book argues for the need to see the project as a form of governmentality that arranges resources and people in time and space and that extends neoliberal forms of managerial control in the sector Ending with suggestions for innovation this book is perfect for anyone looking for an accessible and engaging guide to the international development project whether student researcher or practitioner **A Guide to Systems Research** Mary C. Edson, Pamela Buckle Henning, Shankar Sankaran, 2016-12-15 This guide is designed for systems researchers emerging and seasoned searching for holistic approaches of inquiry into complexity which the Systems Sciences provide The authors share insight into the foundations of research that are not only systematic in terms of rigor but systemic in perspective analysis design development implementation reporting and evaluation This guide also explores researcher competencies necessary to conduct sound systems research Researchers using this guide will gain understanding of what distinguishes systems research from other types of research and why it is important in research today **A Theology of International Development** Thia Cooper, 2020-02-05 Religion and development have been intertwined since development s beginnings yet faith based aid and development agencies consistently fail to consider how their theology and practice intersect This book offers a Christian theology of development with practical solutions to bridge the gap and return to truly faith based policies and practices Development aims to raise the living standard of the world s poor mainly through small scale projects that increase economic growth A theology of liberation provided a critique to development practice but a specific theology of development is still lacking and many faith based aid agencies have failed to adapt their practice In applying theological thinking to development the author argues that aid agencies need to address the

entrenchment of unequal power relations and embrace a holistic notion of development defined by the needs of those most marginalized instead of by a focus on economic growth. Development organisations need to consider the distinction between charity and justice and to empower people in the Global South paying particular attention to the intersections of race class sexuality religion and the environment. Overall this book is a powerful call to upend development practice as it currently exists and to return faith based organizations to following Christian practices. It will be an important read for religion and development researchers practitioners and students.

Promoting Transformative Practices for Sustainability in Early Childhood Education and Care Fabio Dovigo, Sule Alici, 2025-09-30. Offering a fresh perspective on sustainability in the realm of Early Childhood Education and Care, ECEC Promoting Transformative Practices for Sustainability in Early Childhood Education and Care invites educators policymakers and researchers to rethink how young children's engagement with sustainability extends beyond nature experiences promoting a richer multi dimensional understanding. This unique book provides a wider understanding of the relationship between early childhood education and sustainability through a multi faceted picture of the political economic social cultural and natural dimensions embedded in sustainable policies and practices. Aligning with UNESCO's vision of sustainability this book recognises the interdependencies between these dimensions emphasising the importance of addressing intergenerational equity and social justice especially for children to be prepared for and thrive in a rapidly evolving world. This book is structured in two main sections the first explores innovative methodologies like sensory ethnography constructivist Grounded Theory and critical participatory action research while offering frameworks for effective education for sustainability ECEfS the second part evaluates recent ECEfS projects focusing on promoting children's rights agency and well being and highlights how shared leadership and advocacy can drive sustainable futures in ECEC settings. By combining research based insights with practical examples this book is a valuable resource for educators seeking to implement transformative practices in ECEC. Its focus on empowering educators and fostering child centred advocacy makes it an essential read for those committed to building a sustainable future through early education.
