

Advance Praise for **Nazi Steel**

"Marcus Jones has written a fascinating study on how the Germans stumbled over themselves in attempting to incorporate the steel industry in Lorraine that they seized after their great victory of 1940. In clear and forthright fashion Jones lays out the complexities of the contest between the various components that made up a less than perfect Fuehrer state. *Nazi Steel* represents a major contribution to our understanding of how Hitler's Reich did, or did not, function."

— **WILLIAMSON MURRAY**, Professor Emeritus, The Ohio State University

"Marcus Jones' carefully researched account of the effort by an ambitious German industrialist to acquire control of an expropriated French steel works in conquered Lorraine reveals the extent to which racist ideology, bureaucratic politics, commercial greed, and the exigencies of war collided in Nazi industrial policy. Scholars and others interested in the economic peculiarities of Hitler's Germany will find it both a valuable resource and a revealing case study in institutionalized kleptocracy."

— **RICHARD HART SINNREICH**, defense consultant and columnist

"Almost sixty-five years after the end of World War II the world continues to be fascinated with the German military, for better or worse. But any military force is only the tip of the bayonet, so to speak. Behind that bayonet the force requires a powerful national economy, industry, and political structure to equip and sustain it. Marcus Jones' *Nazi Steel* is a penetrating study of one key segment of German industry that contributed to making the Wehrmacht arguably the best and most powerful army the world had ever seen by 1940. Yet Jones' analysis also explores Germany's moral and political corruption that in the long run made it impossible for that nation to maintain and prevail with its military might."

Nazi Steel Friedrich Flick And German Expansion In Western Europe 1940 1944:

Nazi Steel Marcus O Jones,2012-07-15 This study explores an exemplary instance of the close interaction between private and official interests in planning and executing the programs of the Nazi government namely the acquisition in 1941 of the Rombach steel works by the German industrialist Friedrich Flick The industrial concern headed by Flick was among the largest and most influential steel producers and manufacturers of war material in the German economy during World War II Its activities in the occupied territories of western Europe centered on control of the Rombach works a large operation established in Lorraine in the late nineteenth century by German industrialists and expropriated by France along with the entire region in the aftermath of the First World War After successful military operations against France in 1940 the Nazi regime actively sought the collusion of the German industrial community in mobilizing the productive capacity of occupied territories for the war effort and numerous private German businessmen advanced claims on the lucrative assets in Lorraine and adjacent regions In his bid to gain control of the Rombach works Flick was successful for reasons specific to his position within the Nazi German economic system and the character of his interests This account of his activities then serves as a fine example of Nazi economic and occupation policy and its response to party business and bureaucratic influences Nazi Steel Marcus O. Jones,2012 Explains how the Nazi government exploited the steel industry to fuel its war machine

Symonds,2018-04-02 Author of Lincoln and His Admirals winner of the Lincoln Prize The Battle of Midway Best Book of the Year Military History Quarterly and Operation Neptune winner of the Samuel Eliot Morison Award for Naval Literature Craig L Symonds has established himself as one of the finest naval historians at work today World War II at Sea represents his crowning achievement a complete narrative of the naval war and

all of its belligerents on all of the world's oceans and seas between 1939 and 1945. Opening with the 1930 London Conference, Symonds shows how any limitations on naval warfare would become irrelevant before the decade was up as Europe erupted into conflict once more and its navies were brought to bear against each other. World War II at Sea offers a global perspective focusing on the major engagements and personalities and revealing both their scale and their interconnection: the U-boat attack on Scapa Flow and the Battle of the Atlantic, the miracle evacuation from Dunkirk and the pitched battles for control of Norway fjords, Mussolini's Regia Marina at the start of the war, the fourth largest navy in the world and the dominance of the Imperial Japanese Navy, and Japanese naval power in the Pacific, Pearl Harbor, then Midway, the struggles of the Russian Navy and the scuttling of the French Fleet in Toulon in 1942, the landings in North Africa and then Normandy. Here as well are the notable naval leaders: FDR and Churchill, both self-proclaimed Navy men; Karl Dönitz; François Darlan; Ernest King; Isoroku Yamamoto; Erich Raeder; Inigo Campioni; Louis Mountbatten; William Halsey, as well as the hundreds of thousands of seamen and officers of all nationalities whose lives were imperiled and lost during the greatest naval conflicts in history, from small-scale assaults and amphibious operations to the largest armadas ever assembled. Many have argued that World War II was dominated by naval operations; few have shown and how and why this was the case. Symonds combines precision with story-telling verve, expertly illuminating not only the mechanics of large-scale warfare on and below the sea but offering wisdom into the nature of the war itself.

America, Sea Power, and the World James C. Bradford, John F. Bradford, 2022-11-29
