Language and Citizenship in Japan Nanette Gottlieb, 2012-12-12 The relationship between language and citizenship in Japan has traditionally been regarded as a fixed tripartite Japanese citizenship means Japanese ethnicity which in turn means Japanese as one s first language Historically most non Japanese who have chosen to take out citizenship have been members of the oldcomer Chinese and Korean communities born and raised in Japan But this is changing the last three decades have seen an influx of newcomer economic migrants from a wide range of countries many of whom choose to stay The likelihood that they will apply for citizenship to access the benefits it confers means that citizenship and ethnicity can no longer be assumed to be synonyms in Japan This is an important change for national discourse on cohesive communities This book s chapters discuss discourses educational practices and local linguistic practices which call into question the accepted view of the language citizenship nexus in lived contexts of both existing Japanese citizens and potential future citizens Through an examination of key themes relating both to newcomers and to an older group of citizens whose language practices have been shaped by historical forces these essays highlight the fluid relationship of language and citizenship in the Japanese context

Language and Nationality Pietro Bortone, 2021-09-23 What role does language play in the formation and perpetuation of our ideas about nationality and other social categories And what role does it play in the formation and perpetuation of nations themselves and of other human groups Language and Nationality considers these questions and examines the consequences of the notion that a language and a nationality are intrinsically connected Pietro Bortone illustrates how our

use of language reveals more about us than we think is constantly judged and marks group insiders and group outsiders Casting doubt on several assumptions common among academics and non academics alike he highlights how languages significantly differ among themselves in structure vocabulary and social use in ways that are often untranslatable and can imply a particular culture Nevertheless he argues this does not warrant the way language has been used for promoting a national outlook and for teaching us to identify with a nation Above all the common belief that languages indicate nationalities reflects our intellectual and political history and has had a tremendous social cost Bortone elucidates how the development of standardized national languages while having merits has fostered an unrealistic image of nations and has created new social inequalities He also shows how it has obscured the history of many languages artificially altered their fundamental features and distorted the public understanding of what a language is *Citizenship and Language Learning* Audrey Osler,Hugh Starkey,2005 This volume is the result of a British Council seminar on language and citizenship

Language, Nations, and Multilingualism Ying-Ying Tan,Pritipuspa Mishra,2020-12-30 Language Nations and Multilingualism explores the legacy of Herder s ideas about the relationship between language and nationalism in the post colonial world Focusing on how anti colonial and post colonial nations reconcile their myriad multilingualisms with the Herderian model of one language one nation it shows how Herder s model is both attractive and problematic for such nations Why then does the Herderian model have such valency How has the Herderian ideal of one nation one language continued to survive beneath the uncomfortable resolution struck by new multilingual nations as they create fictions of a singular national mother tongue To what extent is Herder still relevant in our contemporary world How have different nations negotiated the Herderian ideal in different ways What does the way in which multilingual post colonial nations deal with this crisis tell us about a possible alternative framework for understanding the relationship between language and nation By approaching this investigation from diverse archives across Asia Africa Europe Latin America and the Caribbean Language Nations and Multilingualism proposes answers to the aforementioned questions from a global perspective that takes into account the specificities of a range of colonial experiences and political regimes And by extending the discussion backwards in time to offer a more historical reading of the making of modern nations it allows us to see how multilingualism has always disrupted constructions of monoglot nations **World Citizenship** Joseph Rotblat,2016-07-27 This book discusses the various ways in

which the security and prosperity of all countries in the world are linked by military threats environmental pollution and social unrest created by poverty It is argued that a process of education is needed to make people think in global terms so that they develop an allegiance to humanity **Citizenship Education in China** Kerry J. Kennedy,Gregory Fairbrother,Zhenzhou Zhao,2013-10-15 There is a flourishing literature on citizenship education in China that is mostly unknown in the West Liberal political theorists often assume that only in democracy should citizens be prepared for their future responsibilities yet citizenship education in China has undergone a number of transformations as the political system

has sought to cope with market reforms globalization and pressures both externally and within the country for broader political reforms Over the past decade Chinese scholars have been struggling for official recognition of citizenship education as a key component of the school curriculum in these changing contexts This book analyzes the citizenship education issues under discussion within China and aims to provide a voice for its scholars at a time when China's international role is becoming increasingly important
