## **Natural Cuba Natural A Natural History:**

Nature, Culture, and Race in Colonial Cuba Lee Sessions, 2024-06-18 A new and necessary examination of how nineteenth century Cuban white elites viewed the natural world material culture and political power as intertwined In the decades before the Cuban wars of independence white elites exploited the island s natural history and culture to redefine racial identity and reassert authority These practices occurred in the face of challenges to their political power from Cubans of mixed race and as Cuba s dependence on sugar led to ecological and economic precarity Lee Sessions uses close visual analysis to investigate how white elites wielded power by manipulating material culture placing in conversation for the first time the natural history museums botanical gardens and thousands of paintings drawings and prints produced in and about Cuba from 1820 to 1860 This important and novel book explores how groups used material culture to imagine their own future at a moment when racial and political dynamics were changing rapidly while facing an ecological disaster of unimaginable scale

States of Nature Stuart George McCook, 2010-07-05 The process of nation building in Latin America transformed the relations between the state the economy and nature Between 1760 and 1940 the economies of most countries in the Spanish Caribbean came to depend heavily on the export of plant products such as coffee tobacco and sugar After the mid nineteenth century this model of export led economic growth also became a central tenet of liberal projects of nation building As international competition grew and commodity prices fell over this period Latin American growers strove to remain competitive by increasing agricultural production By the turn of the twentieth century their pursuit of export led growth had generated severe environmental problems including soil exhaustion erosion and epidemic outbreaks of crop diseases and pests This book traces the history of the intersections between nature economy and nation in the Spanish Caribbean through a history of the agricultural and botanical sciences Growers and governments in Venezuela Puerto Rico Cuba Colombia and Costa Rica turned to scientists to help them establish practical and ideological control over nature They hoped to use science to alleviate the pressing environmental and economic stresses without having to give up their commitment to export led growth Starting from an overview of the relationship among science nature and development throughout the export boom of 1760 to 1930 Stuart McCook examines such topics as the relationship between scientific plant surveys and nation building the development of a creole science to address the problems of tropical agriculture the ecological rationalization of the sugar industry and the growth of technocratic ideologies of science and progress He concludes with a look at how the Great Depression of the 1930s changed the paradigms of economic and political development and the role of science and nature in these paradigms
