Bogousslavsky, 2014-06-27 Hysteria is probably the condition which best illustrates the tight connection between neurology and psychiatry While it has been known since antiquity its renewed studies during the 19th century were mainly due to the work of Jean Martin Charcot

and his school in Paris This publication focuses on these early developments in which immediate followers of Charcot including Babinski Freud Janet Richer and Gilles de la Tourette were involved Hysteria is commonly considered as a condition that often leads to spectacular manifestations e g convulsions palsies although both structural and functional imaging data confirm the absence of consistent and reproducible structural lesions While numerous hypotheses have tried to explain the occurrence of this striking phenomenon the precise nosology and pathophysiology of hysteria remain elusive This volume offers an enthralling and informative read for neurologists psychiatrists and psychologists as well as for general physicians historians and everyone interested in the developments of one of the most intriguing conditions in medicine

*Performing Hysteria* Johanna Braun ,2020-11-16 We seem to be living in hysterical times A simple Google search reveals the sheer bottomless well of hysterical discussions on diverse topics such as the metoo movement Trumpianism border wars Brexit transgender liberation Black Lives Matter COVID 19 and climate change to name only a few Against the backdrop of such recent deployments of hysteria in popular discourse particularly as they emerge in times of material and hermeneutic crisis *Performing Hysteria* re engages the notion of hysteria *Performing Hysteria* rigorously mines late 20th and early 21st century primarily visual culture for signs of hysteria The various essays in this volume contribute to the multilayered and complex discussions that surround and foster this resurgent interest in hysteria covering such areas as art literature theatre film television dance crossing such disciplines as cultural studies political science philosophy history media disability race and ethnicity and gender studies and analysing stereotypical images and representations of the hysteric in relation to cultural sciences and media studies Of particular importance is the volume s insistence on taking the intersection of hysteria and performance seriously

*Haat* Lucas Schalk,Nina Silvester,Esther Spuijbroek, Haat is er altijd soms openlijk soms verscholen Zowel Sigmund Freud als Melanie Klein hebben duidelijk gemaakt dat haat in elke betekenisvolle relatie een belangrijke rol speelt Haat wordt gedefinieerd als een blijvende intense antipathie gepaard aan walging afschuw en minachting als gevolg van aangedaan leed De hater raakt gepreoccupeerd met de gehate persoon of groep Zo heeft haat een sterke impact op de samenleving en de maatschappij is op haar beurt van invloed op het ontstaan ervan In kleiner verband kunnen we ons afvragen hoe haat naar het eigen lichaam te begrijpen is en wat motieven van ouders zijn om hun kind te haten Mensen die vast zijn komen te zitten in haat kunnen in een behandeling in contact komen met vitale woede en daarmee meer keuzevrijheid ervaren De therapeut kan gehaat worden maar de eigen haat die gevoeld kan worden in de tegenoverdracht wordt frequent verdrongen De weggehouden haatgevoelens hebben een negatief effect op de therapeutische relatie Derhalve verdient het hoe ongewenst ook onze volle aandacht

**Non-Epileptic Seizures in Our Experience** Steven C. Schachter MD,2020-04-01 To an outside observer Psychogenic Non Epileptic Seizures PNES look like epileptic seizures The manifestations of PNES include collapses impaired consciousness and seizure related injuries However unlike epileptic seizures which are the result of abnormal electrical discharges in the brain most PNES are an automatic

psychological response to a trigger perceived as threatening Not least because the changes in the brain that underpin PNES cannot be visualised easily with clinical tests such as the EEG there are many uncertainties and controversies surrounding the condition Patients often provoke a mixture of emotions in healthcare professionals In the authors previous book *In Our Words Personal Accounts of Living with Non Epileptic Seizures* over 100 individuals with PNES and their family wrote about their experiences with the condition While some had positive care experiences many were left feeling confused angry and abandoned by the clinicians they had encountered *Non Epileptic Seizures in Our Experience Accounts of Health Care Professionals* complements the authors previous book by presenting the perspectives of over 90 members of different healthcare professions from around the world The anonymous publication format has enabled many not only to share success stories but also to be open about difficulties and failures This volume will be an invaluable resource for both highly experienced professionals as well as relative novice and those experiencing PNES This book will challenge negative attitudes surrounding the condition improve understanding between healthcare professionals and patients and ultimately advance the quality of care provided for those with PNES

*Automatic Religion* Paul Christopher Johnson, 2021-01-12 What distinguishes humans from nonhumans Two common answers free will and religion are in some ways fundamentally opposed Whereas free will enjoys a central place in our ideas of spontaneity authorship and deliberation religious practices seem to involve a suspension of or relief from the exercise of our will What then is agency and why has it occupied such a central place in theories of the human *Automatic Religion* explores an unlikely series of episodes from the end of the nineteenth century when crucial ideas related to automatism and in a different realm the study of religion were both being born Paul Christopher Johnson draws on years of archival and ethnographic research in Brazil and France to explore the crucial boundaries being drawn at the time between humans nearhumans and automata As agency came to take on a more central place in the philosophical moral and legal traditions of the West certain classes of people were excluded as less than human Tracking the circulation of ideas across the Atlantic Johnson tests those boundaries revealing how they were constructed on largely gendered and racial foundations In the process he reanimates one of the most mysterious and yet foundational questions in trans Atlantic thought what is agency

*Seduction, Drive and Repetition* Herman Westerink, Philippe Van Haute, 2025-09-01 This book makes the compelling argument that the key to understanding Freud s clinical writings and psychoanalytical theories lies in his trauma theory The authors argue that Freud never truly abandoned his initial trauma theory the seduction theory in favour of the Oedipus complex and the primacy of fantasy Instead Freud progressively enriched his understanding of trauma expanding his theory to include references to the evolution of human beings and organic life Trauma runs as a red thread throughout Freud s oeuvre It occupies a central position in both his clinical case studies and his meta psychological speculations Freud ultimately develops a metaphysics of trauma and a tragic view of human existence a worldview that continues to resonate within contemporary philosophy and psychoanalysis

*Touch Me,*

I'm Sick Margeaux Feldman, 2025-09-09 Reject the stigmas of trauma and chronic illness by fostering queer forms of intimacy and embracing the many ways humans can care for one another The writer behind the popular softcore\_trauma Instagram offers a deeply personal memoir for folks seeking healing and better care The forms of intimacy and care that we've been sold are woefully inadequate and problematic In a world that treats those who are sick and traumatized as problems in need of a cure nonbinary writer artist educator and Instagram creator Margeaux Feldman offers a different story Trauma which all too often manifests as chronic illness tells us that there is something deeply wrong with the world we live in A world that promotes individualism fractures us from community through violence and systemic oppression and leaves us traumatized That is what we need to cure While unveiling their own lived experiences caregiving for their sick father losing their mother surviving sexual abuse and grappling with their own chronic illness Feldman provides roadmaps for embracing queer modes of care or hysterical intimacies that reject the notion that those who have been labeled sick are broken Feldman looks at the lengthy history of branding girls women and femmes and their desires as sick from the treatment of hysterics by Jean Martin Charcot and Sigmund Freud in the 19th and 20th centuries What emerges is a valiant call for rethinking the ways we seek healing This compelling blend of theory personal narrative and cultural criticism offers a path forward for reimagining the shapes and forms that intimacy care and interdependence can take
