Memonomics The Next Generation Economic System:

Memonomics Said Dawlabani, 2013-09 The term vMEME the superscript v is for value refers to a core value system expressed through a culture's memes i.e. its ideas, habits and cultural preferences and practices that spread from person to person. In MEMEnomics Said E. Dawlabani reframes our economic history and the future of capitalism through the unique prism of a culture's value systems. Focusing on the long-term effects of economic policies on society, he expands psychologist Clare W. Graves' concepts of the hierarchical nature of human development and the theories of value systems of Beck and Cowan's Spiral Dynamics. He presents our economic history in terms of the hierarchy of five of the eight value systems or vMEMEs of human existence that we can now identify. These new value preferences emerge as people interact with their environment to solve the problems of their life conditions.

Spiral Dynamics in Action Prof. Don Edward Beck, Teddy Hebo Larsen, Sergey Solonin, Dr. Rica Viljoen, Thomas Q. Johns, 2018-03-22 A more effective leadership model for the new business environment. Spiral Dynamics in Action explores the evolution of modern business and provides a model for moving forward amidst ever-increasing complexity and change. Only by truly understanding other people's perspectives can you bring them together to achieve the extraordinary, and this book provides a field guide to the different motivations, behaviours and talents in your team to help you lead diverse groups more effectively. Focused on action over theory, the Spiral Dynamics model includes cutting-edge leadership practices, management systems, processes, procedures and techniques to help you bring about real-world results. The nature of change is consistent but that doesn't make it any less enormous or complex to deal with. As a business leader, you are tasked with not only navigating change yourself but also guiding others through the maze successfully. This book shows you how to shift your perspective, hone your focus and deliver what your people need by understanding the reasoning behind different perspectives. Helping people play off one another's strengths to achieve a shared goal. Adopting cutting-edge practices, processes and procedures for improvement. Taking action to re-connect an increasingly fragmented environment. The marketplace has gone truly global, workforces are increasingly diverse and companies are taking on powerful new social responsibilities. It's a lot to take in, let alone manage, but the responsibility of leadership is to gather disparate parts and make them into a whole. It's your job to turn anchors into rocket fuel and motivate and inspire your team to the top. By digging to the core of each person, each culture and each problem, you uncover a roadmap to high performance. Spiral Dynamics in Action shows you how to guide your people through any changes and emerge stronger than before.
