Ann Raftery Meyer

Medieval Cathedral Building History:

The Medieval Cathedral William W. Lace, 2001 This book discusses the history of the medieval cathedrals products of more than a thousand years of both religious and architectural evolution that were built as testaments of faith by the people of the Middle Ages *Church Building and Society in the Later Middle Ages* Gabriel Byng, 2017-12-14 The construction of a church was undoubtedly one of the most demanding events to take place in the life of a medieval parish It required a huge outlay of time money and labour and often a new organisational structure to oversee design and management Who took control and who provided the financing was deeply shaped by local patterns in wealth authority and institutional development from small villages with little formal government to settlements with highly unequal populations This all took place during a period of great economic and social change as communities managed the impact of the Black Death the end of serfdom and the slump of the mid fifteenth century This original and authoritative study provides an account of how economic change local politics and architecture combined in late medieval England It will be of interest to researchers of medieval socio economic and art history **Financing Cathedral Building in the Middle Ages** Wim Vroom, 2025-10-01

This first comprehensive overview of the process of commissioning and financing the construction of cathedrals in the Middle Ages reveals a financing system almost as monumental as the cathedrals themselves Here we follow the historian on a fascinating examination of construction accounts and other sources extant but never so minutely explored bringing the bishop and the chapter to account as it were The book is divided into two parts The first gives a broad overview of the resources on which medieval commissioners could draw including contributions from the bishop chapter sovereign city and above all the faithful of the diocese in which the cathedral was erected The second part is a case study of the financing of construction at Utrecht Cathedral whose archives are among the best preserved in Europe followed by a brief discussion of the financing of several other cathedral building projects throughout Europe and of the church of St Peter s in Rome

Medieval Allegory and the Building of the New Jerusalem Ann Raftery Meyer, 2003 The chantry movement in late medieval England is situated in this context and leads to a demonstration of the movement s associations with the highly wrought poem Pearl and its companion poems the book analyses Pearl as medieval architecture offering fresh perspectives on its elaborate construction and historical context **BOOK JACKET** **Architecture as Experience** Dana Arnold, Andrew Ballantyne, 2004-07-31 This book investigates the perception and appropriation of places across intervals of time and culture The main focus is on bringing together fresh empirical research and animating it with theoretical sophistication *The Splendor of English Gothic Architecture* John Shannon Hendrix, 2012-06-30 This book explains and celebrates the richness of English churches and cathedrals which have a major place in medieval architecture The English Gothic style developed somewhat later than in France but rapidly developed its own architectural and ornamental codes The author John Shannon Hendrix classifies English Gothic architecture in four principal stages the early English Gothic the decorated the curvilinear

and the perpendicular Gothic Several photographs of these architectural testimonies allow us to understand the whole originality of Britain during the Gothic era in Canterbury Wells Lincoln York and Salisbury The English Gothic architecture is a poetic one speaking both to the senses and spirit *The Engineering of Medieval Cathedrals* Lynn T.

Courtenay,2016-12-05 The great cathedrals and churches of the medieval West continue to awe How were they built and why do they remain standing What did their builders know about what they were doing These questions have given rise to considerable controversy which is fully reflected in the papers selected here The first section of the book is concerned with the medieval builders and their design methods the second focuses on engineering issues in the context of the infamous collapse of the choir at Beauvais in 1284 The following papers extend the analysis into the 15th century looking for example at Brunelleschi s dome for Florence Cathedral and deal with the often neglected structures of roofs towers and spires

Reconstructing the Development of Somerset's Early Medieval Church Carole Lomas,2024-05-09 This book uses Somerset as a case study to contribute to a broader understanding of how the Church developed across the British Isles during the transition from the post Roman Church to the 11th century It collates and cross references all earlier research and offers the most up to date study of Somerset s post Roman churches **Early Medieval Architecture** R. A. Stalley,1999 Ranging from Gotland to Apulia Roger Stalley explores the richness and variety of European architecture in terms of the social and religious aspirations of the time with an emphasis on the symbolic significance these buildings expressed Written with style and humour the lively text includes many quotations from ancient sources providing fascinating insight into the way that medieval buildings were created and enlivening our knowledge of this period Motherhood and Meaning in Medieval Sculpture Marian Bleeke,2017 An examination of women as mothers in medieval French sculpture What can medieval sculptural representations of women tell us about medieval women s experiences of motherhood Presumably the work of male sculptors working for clerical patrons these sculptures are unlikely to have been shaped by women s maternal experiences during their production Once produced however their beholders would have included women who were mothers and potential mothers thus opening a space between the sculptures intended meanings and other meanings liable to be produced by these women as they brought their own interests and concerns to these works of art Building on theories of reception and response this book focuses on interactions between women as beholders and a range of sculptures made in France in the twelfth through sixteenth centuries aiming to provide insight into women s experiences of motherhood particular sculptures considered include the Annunciation and Visitation from Reims cathedral the femme aux serpents from Moissac the transi of Jeanne de Bourbon Vendome the Eve from Autun and a number of French Gothic Virgin and Child sculptures Marian Bleeke is Associate Professor of Art History and Chair of the Department of Art and Design at Cleveland State University
