Membrane Protein Cytoskeleton Interactions Volume 43 Current Topics In Membranes:

Membrane Protein-Cytoskeleton Interactions ,1996-11-21 The plasma membrane acts as both a boundary and a site of exchange between the outside and the inside of a cell The cytoskeleton plays essential roles in delineating membrane protein distributions in defining structural and functional domains in the plasma membrane and in regulating membrane protein and ultimately cell function This volume reviews the regulation of membrane protein distribution organization and function at the plasma membrane by the cytoskeleton Discussions also include the roles of cytoskeleton in the structural and functional organization of membranes and membrane proteins with emphasis on key problems the current status of understanding experimental approaches and future directions

Current Topics in Membranes Kim E. Barrett,Mark Donowitz,2001 This title contains comprehensive reviews of novel information in intestinal transport including control of nutrition in gene regulation There are diagrammatic representations of key concepts and processes Additionally this volume offers new insight at a molecular level into the basis of intestinal disease The topics covered in this book also relate to other epithelial organs such as the lungs kidney and biliary system

Membrane Protein Crystallization ,2009-05-29 This volume of Current Topics in Membranes focuses on Membrane Protein Crystallization beginning with a review of past successes and general trends then further discussing challenges of membranes protein crystallization cell free production of membrane proteins and novel lipids for membrane protein crystallization This publication also includes tools to enhance membrane protein crystallization technique advancements and crystallization strategies used for photosystem I and its complexes establishing Membrane Protein Crystallization as a needed practical reference for researchers

Current Topics in Membranes ,1997

Functional Organization of Vertebrate Plasma Membrane ,2013-11-05 Current Topics in Membranes is targeted toward scientists and researchers in biochemistry and molecular and cellular biology providing the necessary membrane research to assist them in discovering the current state of a particular field and in learning where that field is heading This volume covers recent breakthroughs in understanding the molecular and cellular basis for patterning vertebrate plasma membranes A special emphasis is placed on physiological function with chapters covering signaling in the nervous system and heart vision and the immune system consolidates subjects normally dispersed in the literature presents in one volume a subject that has undergone a recent molecular revolution authors are primary contributors and in some cases the founding figures in their fields

Claudins ,2010-06-30 This volume of Current Topics in Membranes focuses on Membrane Protein Crystallization beginning with a review of past successes and general trends then further discussing challenges of membranes protein crystallization cell free production of membrane proteins and novel lipids for membrane protein crystallization This publication also includes tools to enhance membrane protein crystallization technique advancements and crystallization strategies used for photosystem I and its complexes establishing Membrane Protein Crystallization as a needed practical reference for researchers

Peptide-Lipid Interactions Sidney A. Simon,Thomas J. McIntosh,2002-03-26 This volume

contains a comprehensive overview of peptide lipid interactions by leading researchers The first part covers theoretical concepts experimental considerations and thermodynamics The second part presents new results obtained through site directed EPR electron microscopy NMR isothermal calorimetry and fluorescence quenching The final part covers problems of biological interest including signal transduction membrane transport fusion and adhesion Key Features world renowned experts state of the art experimental methods monolayers bilayers biological membranes theoretical aspects and computer simulations rafts synaptic transmission membrane fusion signal transduction

Membrane Fusion Leonid V. Chernomordik, Leonid Vital'evich Chernomordik, Michael M. Kozlov, 2011-07-27 This volume of Current Topics in Membranes focuses on Membrane Fusion beginning with fusion and fission of lipid bilayers with reviews focused on hemifusion and dynamic remodeling of membranes catalyzed by dynamin Other topics discussed include viral fusion intracellular fusion developmental cell fusion and theoretical modeling

The Eye's Aqueous Humor, 2008-11-03 Current Topics in Membranes provides a systematic comprehensive and rigorous approach to specific topics relevant to the study of cellular membranes Each volume is a guest edited compendium of membrane biology Guest edited by cell membrane experts Dynamic and thorough coverage of all aspects of the aqueous humor from inflow to outflow Provides the latest teachings on genomics and glaucoma Highlights new therapeutic strategies for the control of intraocular pressure

Chemokines, Chemokine Receptors and Disease Lisa M. Schwiebert, 2005-09-02 This volume in the Current Topics in Membranes series discusses the biology of chemokines and their binding partners chemokine receptors in normal and disease related states Chemokines are small proteins that are important in normal immune responses Recent research demonstrates a role for these proteins in a variety of diseases such as heart disease allergy asthma and cancer As a result of the discovery of this link to disease the topic of chemokines and drugs that block their actions has become an intense area of study This book presents the topics of chemokines chemokine receptors and related pathologies in an integrated manner that provides the reader with a comprehensive and up to date knowledge of these topics Provides a comprehensive overview of the history molecular biology cell biology pharmacology physiology and pathophysiology of chemokines and their receptors Each chapter discusses future directions and unanswered questions of chemokine biology Serves as a road map for future research
