traditional remedy have provided a solution to these problems for decades. However, as the number of disputes increases, the sufficiency of arbitration in responding to disputes became questionable in addition to the long-lasting and costly cases. Accordingly, ADR mechanisms outside the arbitration cannon have triggered growing interest among practitioners. Despite the attraction and the apparent benefits of ADR such as being cheaper, faster, and with better outcomes compared to arbitration, there are also hurdles in front that hinder the application of ADR. This has led to the underuse of ADR in appropriate contexts. This study has been conducted to research the gap for the applicability of the ADR methods for investment disputes in the energy sector with the doctrinal analysis of the existing literature either promoting or opposing ADR. Its findings provide guidance for alternative dispute resolution practitioners on when to use ADR, how to use ADR, and on what disputes ADR to be used to resolve conflicts in International Energy Investment.
