Scientific Evidence of the Christian Faith, DNA — the Starting Point Victor W. Chang, Guoping Song, 2020-07-04 Does the Christian faith have scientific evidence This is difficult to believe However since DNA was discovered we now understand the entire DNA coding sequence of humans is consistent and the difference is only one thousandth The theory of mathematics probability tells us that it could not be the result of spontaneous generation Therefore the molecular biologist put forward that people of the whole world have the common grandfather Y chromosome Adam theory and the common grandmother Eve theory Do you agree What is amazing is that there is no difference between man's and woman's 2.9 billion chromosomal DNA coding sequence meaning that human DNA coding is from one individual Only men have the complete set of the chromosome so the source individual must be a man and the first woman was from the man The first man had no carnal parents and it only could be Adam created by God Due to the constancy of biological genome DNA coding it is impossible for any species to have an evolution connection not even microevolution This is what is recorded in the Bible as all living from each category It therefore can be seen that life's DNA coding sequence is from God's Creation From our DNA we could see that all the substances and lives in the universe are created by God These scientific facts are totally consistent with the Biblical record and are objective evidence of the Christian faith

The Origin of Species by DNA Coding Victor W Chang & Guoping Song, 2020-06-15 Who are we Where are we from These questions have troubled people for centuries The textbooks have long taught us that human beings evolved from anthropoid apes Today a new science molecular anthropology tells us this 7 billion human beings in the world share a common grand grand father the Y chromosome Adam and share a common grand grand mother the Mitochondrial Eve After

reading information in this book you will be convinced that human beings could not be the result of evolution sudden mutation or in any way related to the anthropoid apes **Genetics** Ruth M. DeBusk,2003 Discover how the Human Genome Project will soon affect dietetic practice in this fascinating new reference Medical nutrition therapy nutrition and food service drug therapy gene therapy gene diagnostics and social and public nutrition policies will all feel the impact of this on going research Each chapter in the Genetic Connection begins to answer the question of how these advances will affect dietetics Prepare for the future with this exciting new title Suing the United States National Academy of Sciences Victor W Chang , Guoping Song,2020-06-30 This book will emphatically argue that human beings and chimpanzees have never shared a common ancestor nor did humans undergo evolution or microevolution Moreover this book will discuss the serious mistakes and misleading guidance the book published by NAS National Academy of Sciences Science Evolution and Creationism makes Their argument that human beings and chimpanzees share a common ancestor is wrong without any scientific basis They also claim that the Theory of Evolution is the cornerstone of modern sciences However the facts shown by DNA codes proved that the Theory of Evolution is wrong Based on a wrong viewpoint as the cornerstone NAS suppresses and impedes the development of science NAS members are leaders in American sciences Therefore they have to bear the necessary responsibility Modern science has determined that hereditary information of all living species is totally defined by its own DNA coding sequences Unique DNA codes define a unique species The overall DNA coding sequences keep high fidelity during the genetic breeding of various species thereby helping scientists find sources of any species Since biological features of all species depend on their own DNA codes DNA codes must be the only correct direction and method for understanding the origin of species **Student Companion Guide to Accompany Principles of Genetics, 4th Edition** D.
