RFID Security and Privacy Dirk Henrici, 2008-04-18 In the beginning of 2003 I found a short article about the privacy implications of RFID technology in a newspaper It raised my interest and after reading some early research papers on the topic I thought There must exist better solutions I concerned myself with the topic in my spare time After having developed my first solutions I asked my supervisor Prof Dr Paul Muller whether I could write a paper about my results As the topic did not fit into any running project or at least the overall research directions of his group he could have answered no But instead he encouraged me to do it The paper became a success and many other papers about new concepts and solutions followed Now the answer is obvious There exist better solutions I have dealt with the topic over the past years Now I want to share the basics as well as current research results with the reader This book is surely not a bedside reading But with all the presented concepts it can broaden the mind of the reader concerning security privacy and RFID systems I wish the reader many new insights There are many people I would like to thank First of all my thanks go to my supervisor Prof Dr Paul Muller He gave me room for creativity and plenty of rope to work on my own
