Sutherland and Donald R. Cressey](#) Edwin Hardin Sutherland, Donald Ray Cressey, 1960 [The Oxford Handbook of Criminological Theory](#) Francis T. Cullen, Pamela Wilcox, 2015-12 This handbook presents a series of essays that captures not the past of criminology but where theoretical explanation is headed The volume is replete with ideas discussions of substantive topics with salient theoretical implications

and reviews of literatures that illuminate avenues along which theory and research evolve *Criminology Theory* Frank P. Williams III, Marilyn D. McShane, 2015-03-02 This highly acclaimed criminology text presents an up to date review of rational choice theories including deterrence shaming and routine activities It also incorporates current examples of deterrence research regarding domestic violence drunk driving and capital punishment and features thought provoking discussion of the relativity of crime The authors explore the crime problem its context and causes of crime The organization of the text reflects the fact that the etiology of crime must be at the heart of criminology It examines contemporary efforts to redefine crime by focusing on family violence hate crimes white collar misconduct with violent consequences and other forms of human behavior often neglected by criminologists Extensive discussion of evolving laws is included and while the prevalence of the scientific method in the field of criminology is highlighted the impact of ideology on explanations of crime is the cornerstone of the book **The Origins of American Criminology** Francis T. Cullen, Andrew J. Myer, Freda Adler, Cheryl Lero Jonson, 2011-02-11 The Origins of American Criminology is an invaluable resource Both separately and together these essays capture the stories behind the invention of criminology s major theoretical perspectives They preserve information that otherwise would have been lost There is urgency to embark on this reflective task given that the generation that defined the field for the past decades is heading into retirement This fine volume insures that their life experiences will not be forgotten The volume shows criminology to be a human enterprise Ideas are not driven primarily and often not at all by data Theories are not invented solely as part of the scientific process they are not inevitable American criminology s great theories most often precede the collection of data they guide and produce empirical inquiry not vice versa Theoretical paradigms are shaped by a host of factors scholars assumptions about the world drawn from their social constructs disciplinary content and ideology cognitive environments found in specific universities and the field s scholarly networks and quirks in a person s biography The volume demonstrates that humanity is what makes theory possible Diverse experiences when we were born where we have lived the unique trajectories of our personal life courses the disciplines and academic places we have ended up allow individual scholars to see the world differently
