Printing The Middle Ages Printing The Middle Ages:

Printing the Middle Ages Sian Echard, 2013-09-25 In *Printing the Middle Ages* Sian Echard looks to the postmedieval postmanuscript lives of medieval texts seeking to understand the lasting impact on both the popular and the scholarly imaginations of the physical objects that transmitted the Middle Ages to the English speaking world Beneath and behind the foundational works of recovery that established the canon of medieval literature she argues was a vast terrain of books scholarly or popular grubby or beautiful widely disseminated or privately printed By turning to these we are able to chart the differing reception histories of the literary texts of the British Middle Ages For Echard any reading of a medieval text whether past or present amateur or academic floats on the surface of a complex sea of expectations and desires made up of the books that mediate those readings Each chapter of *Printing the Middle Ages* focuses on a central textual object and tells its story in order to reveal the history of its reception and transmission Moving from the first age of print into the early twenty first century Echard examines the special fonts created in the Elizabethan period to reproduce Old English the hand drawn facsimiles of the nineteenth century and today's experiments with the digital reproduction of medieval objects she explores the illustrations in eighteenth century versions of *Guy of Warwick* and *Bevis of Hampton* she discusses nineteenth century children's versions of the *Canterbury Tales* and the aristocratic transmission history of John Gower's *Confessio Amantis* and she touches on fine press printings of Dante Froissart and Langland

Printing the Middle Ages Siân Echard, 2008-09-03 *Printing the Middle Ages* focuses on the life of medieval texts after the Middle Ages tracing the impact of the books that transmitted medieval literature to the English speaking world showing how these books imitated and refashioned the medieval past for later audiences

Architecture in the Age of Printing Mario Carpo, 2017-02-10 A history of the influence of communication technologies on Western architectural theory The discipline of architecture depends on the transmission in space and time of accumulated experiences concepts rules and models From the invention of the alphabet to the development of ASCII code for electronic communication the process of recording and transmitting this body of knowledge has reflected the dominant information technologies of each period In this book Mario Carpo discusses the communications media used by Western architects from classical antiquity to modern classicism showing how each medium related to specific forms of architectural thinking Carpo highlights the significance of the invention of movable type and mechanically reproduced images He argues that Renaissance architectural theory particularly the system of the five architectural orders was consciously developed in response to the formats and potential of the new printed media Carpo contrasts architecture in the age of printing with what preceded it Vitruvian theory and the manuscript format oral transmission in the Middle Ages and the fifteenth century transition from script to print He also suggests that the basic principles of typographic architecture thrived in the Western world as long as print remained our main information technology The shift from printed to digital representations he points out will again alter the course of architecture

Print Culture and the Medieval Author Alexandra Gillespie, 2006-11-30 *Print Culture and the Medieval Author* is a book about books Examining hundreds of early printed books and their late medieval analogues Alexandra Gillespie writes a bibliographical history of the poet Geoffrey Chaucer and his follower John Lydgate in the century after the arrival of printing in England Her study is an important new contribution to the emerging sociology of the text in English literary and historical studies At the centre of this study is a familiar question what is an author The idea of the vernacular writer was already contested and unstable in medieval England Gillespie demonstrates that in the late Middle Ages it was also a way for book producers and readers to mediate the risks commercial political religious and imaginative involved in the publication of

literary texts Gillespie's discussion focuses on the changes associated with the shift to print scribal precedents for these changes and contemporary understanding of them The treatment of texts associated with Chaucer and Lydgate is an index to the sometimes flexible sometimes resistant responses of book printers copyists decorators distributors patrons censors owners and readers to a gradual but profoundly influential bibliographical transition The research is conducted across somewhat intractable boundaries Gillespie writes about medieval and modern history about manuscript and print about canonical and marginal authors about literary works and books as objects In the process she finds new meanings for some medieval vernacular texts and a new place for some old books in a history of English culture
