Privatization and Privilege in Education Geoffrey Walford, 2011-12-08 Can privilege be bought Arguments have raged over whether private education in the UK is the cement in the wall dividing British society or whether parental choice is as has also been argued a key component of a free society The author here describes the traditional private sector schools paying attention to the ways in which parents can purchase privilege for their children through attendance at such schools He argues that the privatized system is kept under tight control if a growth in social and educational inequality and a deepening of social class and ethnic group division is to be avoided The book is unique in combining an account of private schools in Britain with an examination of the process of privatization **Privatization and Privilege in Education (RLE Edu L)** Geoffrey Walford, 2012-05-16 Can privilege be bought Arguments have raged over whether private education in the UK is the cement in the wall dividing British society or whether parental choice is as has also been argued a key component of a free society The author here describes the traditional private sector schools paying attention to the ways in which parents can purchase privilege for their children through attendance at such schools He argues that the privatized system is kept under tight control if a growth in social and educational inequality and a deepening of social class and ethnic group division is to be avoided The book is unique in combining an account of private schools in Britain with an examination of the process of privatization *Privatization and Privilege in Education (RLE Edu L)* . , **Towards Successful Schooling (RLE Edu L Sociology of Education)** Hugh Lauder, Cathy Wylie, 2012-05-23 The editors have compiled this critical and comparative study of changes which took place in the New Zealand education system in the second half of the twentieth century For other Western societies who have felt the impact of New Right policies the New Zealand case is interesting because it provides some indication of how policies of decentralization in education might be used to develop egalitarian and democratic educational policies In recent years there have been major changes to educational systems in the Western world Often these changes have been justified by reference to successful educational practices in other countries However it is not always possible simply to abstract educational practices from one context and apply them in another successfully Moreover claims that policies in one country are more successful than those in another have to be treated cautiously there are always problems in making valid comparisons between the educational performances of different countries It is important therefore that critical and comparative studies are made of educational systems which take full account of the contexts in which they are embedded *Class, Culture and Education (RLE Edu L)* Harold Entwistle, 2012-05-23 This book examines the concepts of equality class culture work and leisure and explores their interrelationship through the discussion of some current problems especially the problems posed for schools for the culturally deprived The debate about differential provision of schooling for different social groups is taken up through examination of the assumption that schools are middle class institutions and the claims and counter claims about the possibility of there being a common culture as the basis for a

common curriculum in comprehensive schools The concept of culture and especially the meaning of working class culture receives examination in this context as well as the thesis that any sub culture constitutes an adequate or valid way of life

School Finance Austin D. Swanson, Richard Adams King, Richard Auld King, 1991 **Privatization in and of Public Education** Antonina Santalova, Kaire Põder, 2024 This book explains how education is becoming more privatized around the world to fit local economic and political needs Privatization in and of Public Education categorizes different types of privatization as traditional or non traditional Traditional policies give more rights to private companies to provide education while non traditional policies make public schools more like businesses The authors show that privatization can lead to more efficient schooling but it can also create a trade off between efficiency and equity or inclusion The book presents a range of perspectives on the impact of privatization including structural ethical and subjective effects The book also covers a range of countries and regions including both developed and developing countries This helps readers understand how privatization is playing out in different contexts around the world **Privatization Of Education** Neelam Ramnath Kishan, 2008 Papers presented at the Seminar on Privatization Quality Assurance in Education held at Warangal Privatisation, Education and Social Justice Geoffrey Walford, 2018-01-12 Privatisation in and of education is a process that takes many different forms and is deeply controversial While the shift in who pays is certainly an important dimension of privatisation there have also been changes in the management provision and delivery of schooling In most of the economically developed world discussion about the privatisation of education is now several decades old and yet new forms of privatisation are still being developed and old forms being applied to new situations This book examines the concept and nature of privatisation and explores the impacts of privatisation in terms of social justice The authors extend various arguments about the processes and provide new research and critique Some believe that privatisation can lead to increasing social justice for the poor while others argue the exact opposite This volume contributes to theoretical conceptions of social justice and education as well as providing up to date research results This book was originally published as a special issue of Oxford Review of Education **Education Plc** Stephen J. Ball, 2007 Presenting an account of the privatisation of education this book questions the kind of future we want for education and what role privatisation and the private sector might have and crucially how justice and ethical behaviour can be balanced against a necessary pragmatism
