- This solution manual remains under construction. The current count is that 575 out of 695 problems in the text are solved here, including all problems through Chapter 5.
- At the moment, we have not confirmed the correctness of every single solution. If you find errors or have suggestions or comments, please send email to ryates@winlab.rutgers.edu.
- MATLAB functions written as solutions to homework problems can be found in the archive `mat_soln.zip` (available to instructors) or in the directory `mat_soln`. Other MATLAB functions used in the text or in these homework solutions can be found in the archive `mat_code.zip` or directory `mat_code`. The `.m` files in `mat_code` are available for download from the Wiley website. Two other documents of interest are also available for download:
 - A manual `probsatlab.pdf` describing the `mat_code.m` functions is also available.

Modeling Random Processes for Engineers and Managers James J. Solberg, 2008-12-22 Modeling Random Processes for Engineers and Managers provides students with a gentle introduction to stochastic processes emphasizing full explanations and many examples rather than formal mathematical theorems and proofs The text offers an accessible entry into a very useful and versatile set of tools for dealing with uncertainty and variation Many practical examples of models as well as complete explanations of the thought process required to create them motivate the presentation of the computational methods In addition the text contains a previously unpublished computational approach to solving many of the equations that occur in Markov processes Modeling Random Processes is intended to serve as an introduction but more advanced students can use the case studies and problems to expand their understanding of practical uses of the theory
