A full-page background image of Napoleon Bonaparte in his imperial regalia. He is wearing a white ermine-trimmed cloak over a red robe, a golden crown, and holding a scepter in his right hand. The background is dark and ornate, suggesting a palace interior.

Radicalism and Cultural Dislocation in Ethiopia, 1960-1974 Messay Kebede, 2008 A provocative investigation into the root causes of the Ethiopian political upheavals in the second half of the twentieth century During the 1960s and early 1970s a majority of Ethiopian students and intellectuals adopted a Marxist Leninist ideology with fanatic fervor The leading force in an uprising against the imperial regime of Emperor Haile Selassie they played a decisive role in the rise of a Leninist military regime In this original study Messay Kebede examines the sociopolitical and cultural factors that contributed to the radicalization of the educated elite in Ethiopia and how this phenomenon contributed to the country's uninterrupted political crises and economic setbacks since the Revolution of 1974 Offering a unique insider's perspective garnered from his direct participation in the student movement the author emphasizes the role of the Western education system in the progressive radicalization of students and assesses the impact of Western education on traditional cultures The most comprehensive study of the role of students in modern Ethiopian political history to date *Radicalism and Cultural Dislocation in Ethiopia 1960 1974* opens the door for discussion and debate on the issue of African modernization and the effects of cultural colonization Messay Kebede is Professor in the Department of Philosophy at the University of Dayton and is author of *Survival and Modernization Ethiopia's Enigmatic Present A Philosophical Discourse* 1999 *The British National Bibliography* Arthur James Wells, 2001 **The Challenge of Revolution** Vladimir Mau, Irina Starodubrovskaya, 2001-02-22 This volume provides a challenging and controversial explanation of the recent events in Russia It examines the causes

processes and consequences of Russia's recent political development. Drawing on and criticizing the existing literature, the book also shows how the recent Russian experience casts light on general theories of revolution and comparative political developments. The transformation in Russia is usually compared with transformations in other post-communist countries. The authors argue that the Russian transformation should be explained in the logic of the great revolutions of the past, such as the English Civil War, the French Revolution, and the Bolshevik Revolution. The difficulties and inconsistency of Russian reforms are usually explained as a result of mistakes made by reformers. This book argues, however, that these problems should be considered as a natural consequence of the weak state. In revolution, the weakness of state power is inevitable, resulting from social fragmentation, property rights transformation, changes in the interests of different social groups. Hence, the authors argue that most of the transitional problems in Russia were unavoidable. The authors go on to argue that revolutions are usually considered as rapid change made through violence. However, the spontaneous character of change in the situation of a weak state is a much more important feature of any revolution than violence. The book contains unique interviews with four leaders of the Russian transformation: Mikhail Gorbachev, Alexander Yakovlev, Yegor Gaidar, and Gennadii Burbulis, as well as the personal experience of the authors who were deeply involved in the practical process of Russian transformation.

The Encyclopedia of the Industrial Revolution in World History

Kenneth E. Hendrickson III, 2014-11-25. As editor, Kenneth E. Hendrickson III notes in his introduction: Since the end of the nineteenth century, industrialization has become a global phenomenon. After the relative completion of the advanced industrial economies of the West, after 1945 patterns of rapid economic change invaded societies beyond western Europe, North America, the Commonwealth, and Japan. In *The Encyclopedia of the Industrial Revolution in World History*, contributors survey the Industrial Revolution as a world historical phenomenon rather than through the traditional lens of a development largely restricted to Western society. *The Encyclopedia of the Industrial Revolution in World History* is a three-volume work of over 1,000 entries on the rise and spread of the Industrial Revolution across the world. Entries comprise accessible but scholarly explorations of topics from the aerospace industry to zaibatsu. Contributor articles not only address topics of technology and technical innovation but emphasize the individual human and social experience of industrialization. Entries include generous selections of biographical figures and human communities, with articles on entrepreneurs, working men and women, families, and organizations. They also cover legal developments, disasters, and the environmental impact of the Industrial Revolution. Each entry also includes cross references and a brief list of suggested readings to alert readers to more detailed information. *The Encyclopedia of the Industrial Revolution in World History* includes over 300 illustrations, as well as artfully selected extended quotations from key primary sources, from Thomas Malthus' *Essay on the Principle of Population* to Arthur Young's look at Birmingham, England, in 1791. This work is the perfect reference work for anyone conducting research in the areas of technology, business, economics, and history on a world historical scale. *Political Outbreaks against the*

The Anatomy of Revolution Revisited Bailey Stone, 2014 This study aims to update a classic of comparative revolutionary analysis Crane Brinton's 1938 study *The Anatomy of Revolution* It invokes the latest research and theoretical writing in history political science and political sociology to compare and contrast in their successive phases the English Revolution of 1640-60 the French Revolution of 1789-99 and the Russian Revolution of 1917-29 This book intends to do what no other comparative analysis of revolutionary change has yet adequately done It not only progresses beyond Marxian socioeconomic class analysis and early revisionist stresses on short term accidental factors involved in revolutionary causation and process it also finds ways to reconcile state centered structuralist accounts of the three major European revolutions with postmodernist explanations of those upheavals that play up the centrality of human agency revolutionary discourse mentalities ideology and political culture
