Perfect Rigour Masha Gessen, 2011-03-03 In 2006 an eccentric Russian mathematician named Grigori Perelman solved one of the world's greatest intellectual puzzles The Poincare conjecture is an extremely complex topological problem that had eluded the best minds for over a century In 2000 the Clay Institute in Boston named it one of seven great unsolved mathematical problems and promised a million dollars to anyone who could find a solution Perelman was awarded the prize this year and declined the money Journalist Masha Gessen was determined to find out why Drawing on interviews with Perelman's teachers classmates coaches teammates and colleagues in Russia and the US and informed by her own background as a math whiz raised in Russia she set out to uncover the nature of Perelman's astonishing abilities In telling his story Masha Gessen has constructed a gripping and tragic tale that sheds rare light on the unique burden of genius

Eight Habits of Highly Effective Math Students (and the Teachers Who Teach Them) Sue Chapman, Holly Burwell, Mary Mitchell, 2025-03-20 Essential habits to build mathematical confidence and competence for all students It has been said that teachers make approximately 1 500 decisions a day Given the volume of work it is no wonder that these decisions are frequently made reflex like and in the moment By intentionally nurturing effective habits in students as well as in teachers we can make these decisions more deliberately and in so doing foster a positive relationship with mathematics that will set students on an unstoppable trajectory of math learning Eight Habits of Highly Effective Math Students and the Teachers Who Teach Them focuses on developing eight essential habits that support mathematical competence and confidence in students This resource is designed as a personalized practice based professional learning experience leading you through a wealth of professional learning and application activities to support you in growing a specific math habit in your classroom to strengthen your students math learning and build your own efficacy The book offers the chance to choose your own adventure through three teacher inquiry options focused on a specific math habit Give it a Go

An Informal Exploration of a Teaching Action and Its Impact on Student Learning Classroom Inquiry A Classroom Based Teacher Inquiry Project Focus on Equity A Teacher Inquiry to Notice and Disrupt Patterns of Inequity This book provides an actionable framework for improving math teaching and learning by Emphasizing a commitment to equity because all students are capable of learning high level mathematics when provided with access to high quality instruction Helping teachers develop mindsets and habits to consciously reflect on their instructional practice to continually strengthen teaching effectiveness and student learning outcomes Curating short readings and practice based professional learning activities that

can be engaged in individually or collaboratively Highlighting the importance of celebrating growth and the role of teachers in nurturing good habits in their students Offering a guide to coaching the habit through a process called Notice Nurture Name and Nudge Eight Habits of Highly Effective Math Students and the Teachers Who Teach Them is grounded in the unwavering belief that all students are math capable and all teachers can effectively teach mathematics The book can be used individually by elementary school teachers and education leaders at school and district levels or in collaborative professional learning settings It is an excellent companion to Holly Burwell and Sue Chapman s book Power Up Your Math Community Corwin 2024

Eureka Math Grade 5 Study Guide Great Minds,2015-11-09 Eureka Math is a comprehensive content rich PreK 12 curriculum that follows the focus and coherence of the Common Core State Standards in Mathematics CCSSM and carefully sequences the mathematical progressions into expertly crafted instructional modules The companion Study Guides to Eureka Math gather the key components of the curriculum for each grade into a single location unpacking the standards in detail so that both users and non users of Eureka Math can benefit equally from the content presented Each of the Eureka Math Curriculum Study Guides includes narratives that provide educators with an overview of what students should be learning throughout the year information on alignment to the instructional shifts and the standards design of curricular components approaches to differentiated instruction and descriptions of mathematical models The Study Guides can serve as either a self study professional development resource or as the basis for a deep group study of the standards for a particular grade For teachers who are new to the classroom or the standards the Study Guides introduce them not only to Eureka Math but also to the content of the grade level in a way they will find manageable and useful Teachers familiar with the Eureka Math curriculum will also find this resource valuable as it allows for a meaningful study of the grade level content in a way that highlights the coherence between modules and topics The Study Guides allow teachers to obtain a firm grasp on what it is that students should master during the year The Eureka Math Curriculum Study Guide Grade 5 provides an overview of all of the Grade 5 modules including Place Value and Decimal Fractions Multi Digit Whole Number and Decimal Fraction Operations Addition and Subtraction of Fractions Multiplication and Division of Fractions and Decimal Fractions Addition and Multiplication with Volume and Areal Problem Solving with the Coordinate Plane

Nurturing Your Child's Math and Literacy in Pre-K-Fifth Grade Mary Mueller,Alisa Hindin,2016-11-23 With recent changes in the curriculum and standards in language arts and mathematics parents often are challenged to find ways to help their children be successful in their learning endeavors While parents want to be involved in their children s education they are often unsure of their role in their children s learning and the best ways to help their children to succeed academically Moreover with the changes in how math and literacy are being taught parents often struggle with helping even first grade children with their homework In this book we set out to alleviate this struggle by offering parents a resource they can use to navigate their child s education communicate with teachers and support their children in learning mathematics and literacy After providing an overview of

the current educational climate and tips for communication with teachers we share strategies and suggestions parents can use to assist their children in language arts and mathematics We provide detailed descriptions of activities games books and conversations that connect with what children will be learning at each grade level Perfect Rigor Masha Gessen,2009-11-11 A gripping and tragic tale that sheds rare light on the unique burden of genius In 2006 an eccentric Russian mathematician named Grigori Perelman solved the Poincare Conjecture an extremely complex topological problem that had eluded the best minds for over a century A prize of one million dollars was offered to anyone who could unravel it but Perelman declined the winnings and in doing so inspired journalist Masha Gessen to tell his story Drawing on interviews with Perelman s teachers classmates coaches teammates and colleagues in Russia and the United States and informed by her own background as a math whiz raised in Russia Gessen uncovered a mind of unrivaled computational power one that enabled Perelman to pursue mathematical concepts to their logical sometimes distant end But she also discovered that this very strength turned out to be Perelman s undoing and the reason for his withdrawal first from the world of mathematics and then increasingly from the world in general *Effective Math Instruction* Jared Dupree,2016-02-01 This easy to use classroom resource provides a series of lessons templates and exemplars for practical classroom application and will help teachers understand the content standards and the mathematical practice standards in order to develop meaningful mathematics lessons This book primarily focuses on teachers procedural knowledge of standards implementation as they apply the information and resources presented in this book Mathematical rigor in the classroom for students includes lessons that target conceptual knowledge procedural knowledge factual knowledge meta cognitive knowledge and the application of this knowledge in context It also includes opportunities for teachers to develop all three dimensions of rigor as it applies to the Common Core *Making Math Accessible to English Language Learners (Grades 3-5)* r4Educated Solutions,2011-12-30 Making Math Accessible for English Language Learners provides practical classroom tips and suggestions to strengthen the quality of classroom instruction for teachers of mathematics The tips and suggestions are based on research in practices and strategies that address the affective linguistic and cognitive needs of English language learners **School Effects on Educational Achievement in Mathematics and Science, 1985-86** Carolyn L. Arnold,Phillip Kaufman,Deborah Sherman Sedlacek,1992 This report examines the effects of both student and school characteristics on mathematics and science achievement levels in the third seventh and eleventh grades using data from the 1985 86 National Assessment of Educational Progress NAEP Analyses feature hierarchical linear models HLM a regression like statistical technique that addresses the problem of students nested within schools by directly modeling within and between schools variation in achievement Additionally HLM allows examination of the impact of school characteristics on the relationship between student characteristics and achievement within schools Following an executive summary this report contains 1 an introduction including information on the background and purpose of the study a description of data sources and variables used in the

analyses and an outline of the methodological approach utilized 2 a summary of the effects of school characteristics on mathematics achievement for each of the three grades with respect to the within school model and the five between school models 3 a summary of the effects of school characteristics on science achievement for each of the three grades with respect to the within school model and the five between school models enlarged with a comparison of mathematics and science results 4 an extensive discussion of the findings in relation to methodological goals grade level differences school size disassociation of socio economic influences from race ethnicity tracking gender differences and teacher characteristics and 5 appendices that include technical notes for the variables and the HLM methodology descriptive statistics for selected characteristics and supporting tables for the HLM results In general the school characteristics examined in the analyses provided better explanations for average achievement between schools than they did for the effects of gender race ethnicity and socioeconomic status on achievement JJK
