Human-Computer Interaction Symposium Fabio Paternò,Annelise Mark Pejtersen,2008-07-08 The IFIP World Computer Congress WCC is one of the most important conferences in the area of computer science and a number of

related Human and Social Science disciplines at the worldwide level and it has a federated structure which takes into account the rapidly growing and expanding interests in this area Human Computer Interaction is now a mature and still dynamically evolving part of this area which is represented in IFIP by the Technical Committee 13 on HCI We are convinced that in this edition of WCC which takes place for the first time in Italy it will be interesting and useful to have a Symposium on Human Computer Interaction in order to present and discuss a number of contributions in this field There has been increasing awareness among designers of interactive systems of the importance of designing for usability but we are still far from having products that are really usable and usability can mean different things depending on the application domain We are all aware that too many users of current technology feel often frustrated because computer systems are not compatible with their abilities and needs with existing work practices As designers of tomorrow technology we have the responsibility of creating computer artefacts that would permit better user experience with the various computing devices so that users may enjoy more satisfying experiences with information and communications technologies

People and Computers XIX - The Bigger Picture Tom McEwan, Jan Gulliksen, David Benyon, 2007-12-20 As a new medium for questionnaire delivery the Internet has the potential to revolutionize the survey process Online Web based questionnaires provide several advantages over traditional survey methods in terms of cost speed appearance flexibility functionality and usability Bandilla et al 2003 Dillman 2000 Kwak they can incorporate links and it is possible to encode difficult skip patterns making such patterns virtually invisible to respondents Despite this and the emergence of numerous tools to support online questionnaire creation current electronic survey design typically replicates the look and feel of paper based questionnaires thus failing to harness the full power of the electronic survey medium A recent environmental scan of online questionnaire design tools found that little if any support is incorporated within these tools to guide questionnaire design according to best practice Lumsden Morgan 2005 This paper briefly introduces a comprehensive set of guidelines for the design of online questionnaires It then focuses on an informal observational study that has been conducted as an initial assessment of the value of the set of guidelines as a practical reference guide during online questionnaire design

2 Background Online questionnaires are often criticized in terms of their vulnerability to the four standard survey error types namely coverage non response sampling and measurement errors
