Microphone Techniques in Stereo and Surround Recording Adam Rosiński, 2022-11-22 Sound engineering is one of the fastest growing branches of music production. The need for a broad based discussion on the issues constituting the art of sound engineering persists and loses none of its relevance revealing that sound engineering should not be investigated only in the mathematical and physical context musical acoustics or the engineering aspect signal processing and modification. Publications targeted primarily at musicians are few and far between which is why the mutual understanding for different priorities which effectively concern the same issues faced by the engineer the acoustician and the musician seems to be a complex problem and the main concept explored in this publication. This book is intended for musicians or sound directors but also acousticians and sound engineers wishing to learn how the musicians think. The monograph is also addressed to musicians who intend to record their material in the studio in the near future but do not possess knowledge on studio construction studio workflow or the art of recording. It seems important to familiarize the musicians with the reality that awaits them on the other side of the glass thus fostering their responsibility for the work jointly produced by them entering the studio and the sound director.

The Child as Musician Gary McPherson, 2015 The new edition of *The Child as Musician* celebrates the richness and diversity of the many different ways in which children can engage in and interact with music. It presents theory both cutting edge and classic in an accessible way for readers by surveying research concerned with the development and acquisition of musical skills.

Music, Technology, Innovation Carol Johnson, Andrew King, 2024-12-03 *Music Technology Innovation Industry and Educational Perspectives* draws upon cutting edge practice in the use of technology from both a pedagogical and industry perspective. Situated within the latest research this edited volume explores technological innovation from a musical perspective examines current trends within the industry and carefully considers them from an educational perspective. Noted throughout history music education is responsive to industry innovations. However emerging technologies often begin with over hyped promises before they move through various phases of development and are then repurposed for learning and teaching. Educators can adopt an innovation and develop a framework that is pedagogically sound and learner centred. Based on these ideas the authors together highlight industry innovations that have potential outcomes for engaging students in music learning within research informed practices build upon these ideas and identify proactive mechanisms for teaching music education and work towards developing a framework for understanding these phenomena. The chapters address key topics including the ethics of technology AI and music online performance and teaching gamification big data teaching audio production acoustic ecology and more. The examination of areas in contemporary innovation can further support the potential to empower teachers and students to understand the opportunities for teaching sustainability and growth in music education.

Creative and Critical Projects in Classroom Music John Finney, Chris Philpott, Gary Spruce, 2020-10-29 *Creative and Critical Projects in Classroom Music* is both a celebration and extension of John Paynter and Peter Aston's groundbreaking work on creative classroom music. Sound and

Silence first published in 1970 Building on the central themes of the original work the child as artist the role of musical imagination and creativity and the process of making music the authors and contributors provide a contemporary response to the spirit and style of Sound and Silence They offer reflections on the ideas and convictions underpinning Paynter and Aston s work in light of scholarship developed during the intervening years This critical work is accompanied by 16 creative classroom projects designed and enacted by contemporary practitioners raising questions about the nature and function of music in education and society In summary this book aims to Celebrate seminal work on musical creativity in the classroom Promote the integration of practical critical and analytical writing and thinking around this key theme for music education Contribute to initiating the next 50 years of thought in relation to music creativity in the classroom Offering a unique combination of critical scholarship and practical application and published on the occasion of the 50th anniversary of Sound and Silence themes from Paynter and Aston s work are here given fresh context that aims to inspire a new generation of innovative classroom practice and to challenge current ways of thinking about the music classroom
