Maida, 2015-07-01 Anthropologists have acted as experts and educators on the nature and ways of life of people worldwide working to understand the human condition in broad comparative perspective As a discipline anthropology has often advocated and even defended the cultural integrity authenticity and autonomy of societies across the globe Public anthropology today carries out the discipline s original purpose grounding theories in lived experience and placing empirical knowledge in deeper historical and comparative frameworks This is a vitally important kind of anthropology that has the goal of improving the modern human condition by actively engaging with people to make changes through research education and political action A Companion to the Anthropology of Environmental Health Merrill Singer, 2016-04-05 A Companion to the Anthropology of Environmental Health presents a collection of readings that utilize a medical anthropological approach to explore the interface of humans and the environment in the shaping of health and illness around the world Features the latest ethnographic research from around the world related to the multiple impacts of the environment on health and of societies on their environments Includes contributions from international medical anthropologists conservationists environmental experts public health professionals health clinicians and other social scientists Analyzes the conditions of cultural and social transformation that accompany environmental and ecological impacts in all areas of the world Offers critical perspectives on theoretical and methodological advancements in the anthropology of environmental health along with future directions in the field **Transdisciplinary Ethnography in India** Rosa Maria Perez, Lina M. Fruzzetti, 2021-08-18 This book familiarises readers with a new way to treat the subject of gender foregrounding the real voices of women their experiences doing ethnographic work and their courage in sharing their stories publicly for the first time in the context of India A useful companion to more theory based anthropological studies the book connects ethnographic data to what eventually becomes theories formed from the field Chapters by women from a variety of disciplines Anthropology Literary and Translation studies Political Sciences transcend the academic boundaries between social sciences and humanities The book shows how the researchers navigate in the field write in ways that defy their academic life and work and call into question their narrative voice The book presents a space for women to reflect on their individual themes of research and at partially filling the vacuum mentioned above the silences of women s voices and expressions The experiences described in the chapters differ both along the divide of a native and a non native fieldworker and along different disciplinary fields but they share the experience of a long term fieldwork in India and the need to self reflect on the impact of this experience on the way the field is represented on the people encountered in the field on the way the field impacted on the fieldworker The book

is a useful presentation of how female researchers act in the field as women and scholars Filling a gap in the existing literature of ethnographic research methods the book will be of interest to students and researchers interested in the fields of Gender Studies Social Work Sociology Anthropology and Asian Studies **The Routledge Handbook of Anthropology and the City** Setha Low,2018-10-03 The Routledge Handbook of Anthropology and the City provides a comprehensive study of current and future urban issues on a global and local scale Premised on an engaged approach to urban anthropology the volume adopts a thematic approach that covers a wide range of modern urban issues with a particular focus on those of high public interest Topics covered include security displacement social justice privatisation sustainability and preservation Offering valuable insight into how anthropologists investigate make sense of and then address a variety of urban issues each chapter covers key theoretical and methodological concerns alongside rich ethnographic case study material The volume is an essential reference for students and researchers in urban anthropology as well as of interest for those in related disciplines such as urban studies sociology and geography **The Oxford Handbook of Ethnographies of Crime and Criminal Justice** Sandra M. Corruption in Public Administration Davide Torsello, 2016-08-26 Despite the growth in literature on political corruption contributions from field research are still exiguous This book provides a timely and much needed addition to current research bridging the gap and providing an innovative approach to the study of corruption and integrity in public administration *The Rosewood Massacre* Edward González-Tennant, 2019-09-16 The Rosewood Massacre investigates the 1923 massacre that devastated the predominantly African American community of Rosewood Florida The town was burned to the ground by neighboring whites and its citizens fled for their lives None of the perpetrators were convicted Very little documentation of the event and the ensuing court hearings survives today Last Project Standing Catherine Fennell, 2015-11-28 In 1995 a half vacant public housing project on Chicago's Near West Side fell to the wrecking ball The demolition and reconstruction of the Henry Horner housing complex ushered in the most ambitious urban housing experiment of its kind smaller mixed income and partially privatized developments that the thinking went would mitigate the insecurity isolation and underemployment that plagued Chicago's infamously troubled public housing projects Focusing on Horner's redevelopment Catherine Fennell asks how Chicago's endeavor transformed everyday built environments into laboratories for teaching urbanites about the rights and obligations of belonging to a city and a nation that seemed incapable of taking care of its most destitute citizens Drawing on more than three years of ethnographic and archival research she

shows how collisions with everything from haywire heating systems and decaying buildings to silent neighbors became an education in the possibilities but also the limits of collective care concern and protection in the aftermath of welfare failure As she documents how the materiality of both the unsuccessful older projects and the recently emerging housing fosters feelings of belonging and loss her work engages larger debates in critical anthropology and poverty studies and opens a vital new perspective on the politics of space race and development in urban America Clarity, Cut, and Culture Susan Falls, 2014 Images of diamonds appear everywhere in American culture And everyone who has a diamond has a story to tell about it Our stories about diamonds not only reveal what we do with these tiny stones but also suggest how we create value meaning and identity through our interactions with material culture in general Things become meaningful through our interactions with them but how do people go about making meaning What can we learn from an ethnography about the production of identity creation of kinship and use of diamonds in understanding selves and social relationships By what means do people positioned within a globalized political economy and a compelling universe of advertising interact locally with these tiny polished rocks This book draws on 12 months of fieldwork with diamond consumers in New York City as well as an analysis of the iconic De Beers campaign that promised romance status and glamour to anyone who bought a diamond to show that this thematic pool is just one resource among many that diamond owners draw upon to engage with their own stones The volume highlights the important roles that memory context and circumstance also play in shaping how people interpret and then use objects in making personal worlds It shows that besides operating as subjects in an ad burdened universe consumers are highly creative idiosyncratic and theatrical agents
