Rings And Categories Of Modules Graduate Texts In Mathematics:

Rings and Categories of Modules F.W. Anderson, K.R. Fuller, 2012-12-06 This book is intended to provide a reasonably self contained account of a major portion of the general theory of rings and modules suitable as a text for introductory and more advanced graduate courses We assume the familiarity with rings usually acquired in standard undergraduate algebra courses Our general approach is categorical rather than arithmetical The continuing theme of the text is the study of the relationship between the one sided ideal structure that a ring may possess and the behavior of its categories of modules Following a brief outline of set theoretic and categorical foundations the text begins with the basic definitions and properties of rings modules and homomorphisms and ranges through comprehensive treatments of direct sums finiteness conditions the Wedderburn Art in Theorem the Jacobson radical the hom and tensor functions Morita equivalence and duality de composition theory of injective and projective modules and semiperfect and perfect rings Both to illustrate the text and to extend it we have included a substantial number of exercises covering a wide spectrum of difficulty There are of course many important areas of ring and module theory that the text does not touch upon For example we have made no attempt to cover such subjects as homology rings of quotients or commutative ring theory

Rings and Categories of Modules Frank W Anderson, Kent R Fuller, 1998-08-18 Abelian Groups, Rings, Modules, and Homological Algebra Pat Goeters, Overtoun M.G. Jenda, 2016-04-19 About the book In honor of Edgar Enochs and his venerable contributions to a broad range of topics in Algebra top researchers from around the world gathered at Auburn University to report on their latest work and exchange ideas on some of today's foremost research topics This carefully edited volume presents the refereed papers of the par

Rings, Modules and Codes André Leroy, Christian Lomp, Sergio López-Permouth, Frédérique Oggier, 2019-04-12 This book contains the proceedings of the Fifth International Conference on Noncommutative Rings and their Applications held from June 12-15 2017 at the University of Artois Lens France The papers are related to noncommutative rings covering topics such as ring theory with both the elementwise and more structural approaches developed module theory with popular topics such as automorphism invariance almost injectivity ADS and extending modules and coding theory both the theoretical aspects such as the extension theorem and the more applied ones such as Construction A or Reed Muller codes Classical topics like enveloping skewfields weak Hopf algebras and tropical algebras are also presented Ring Theory and Its Applications Dinh Van Huynh, S. K. Jain, Sergio R. López-Permouth, S. Tariq Rizvi, Cosmin S. Roman, 2014-02-21 This volume contains the proceedings of the Ring Theory Session in honor of T Y Lam's 70th birthday at the 31st Ohio State Denison Mathematics Conference held from May 25-27 2012 at The Ohio State University Columbus Ohio Included are expository articles and research papers covering topics such as cyclically presented modules Eggert's conjecture the Mittag Leffler conditions clean rings McCoy rings QF rings projective and injective modules Baer modules and Leavitt path algebras Graduate students and researchers in many areas of algebra will find this volume valuable as the papers point out many directions for future work in

Model Theory of Modules, Algebras and Categories Alberto Facchini, Lorna Gregory, Sonia L'Innocente, Marcus Tressl, 2019-05-31 This volume contains the proceedings of the international conference Model Theory of Modules Algebras and Categories held from July 28 August 2 2017 at the Ettore Majorana Foundation and Centre for Scientific Culture in Erice Italy Papers contained in this volume cover recent developments in model theory module theory and category theory and their intersection

Categories of Modules over Endomorphism Rings Theodore Gerard Faticoni, 1993 It is the goal of the memoir to develop a functorial transfer of properties between italic capital A and script capital M subscript italic capital E the category of modules over italic capital E that is more sensitive than the traditional starting point Hom italic capital A This memoir should be accessible to anyone who has a working knowledge of rings modules functors and categories equivalent to that gained by reading Anderson and Fuller's text *Rings and Categories of Modules*

Rings, Modules, Algebras, and Abelian Groups Alberto Facchini, Evan Houston, Luigi Salce, 2020-02-10 *Rings Modules Algebras and Abelian Groups* summarizes the proceedings of a recent algebraic conference held at Venice International University in Italy Surveying the most influential developments in the field this reference reviews the latest research on Abelian groups algebras and their representations module and ring theory and topological

Introduction to Ring and Module Theory Alberto Facchini, 2025-03-29 This textbook is designed for a first course in ring theory module theory and category theory Written following several decades of teaching experience it stands out with its clear and engaging style featuring thorough explanations and attention to detail Carefully selected exercises encourage active learning and problem solving The textbook integrates elementary category theory with basic concepts and examples developed throughout the course Although the primary focus is on rings and modules relevant notions for other algebraic structures such as groups and semigroups are also discussed Thus this book aims at introducing students to noncommutative rings and modules within a broader algebraic context Aimed at advanced undergraduates or master students in mathematics this textbook is suitable both for use in the classroom and self study Whereas the first part of the book covers a basic course in ring and module theory the latter part includes optional deepening topics

Advances in Rings and Modules Sergio R. López-Permouth, Jae Keol Park, S. Tariq Rizvi, Cosmin S. Roman, 2018-09-06 This volume dedicated to Bruno J M Ller a renowned algebraist is a collection of papers that provide a snapshot of the diversity of themes and applications that interest algebraists today The papers highlight the latest progress in ring and module research and present work done on the frontiers of the topics discussed In addition selected expository articles are included to give algebraists and other mathematicians including graduate students an accessible introduction to areas that may be outside their own expertise
