People And Pixels Linking Remote Sensing And Social Science:

People and Pixels National Research Council, Division of Behavioral and Social Sciences and Education, Board on Environmental Change and Society, Committee on the Human Dimensions of Global Change, 1998-06-21 Space based sensors are giving us an ever closer and more comprehensive look at the earth's surface they also have the potential to tell us about human activity This volume examines the possibilities for using remote sensing technology to improve understanding of social processes and human environment interactions Examples include deforestation and regrowth in Brazil population environment interactions in Thailand ancient and modern rural development in Guatemala and urbanization in the United States as well as early warnings of famine and disease outbreaks The book also provides information on current sources of remotely sensed data and metadata and discusses what is involved in establishing effective collaborative efforts between scientists working with remote sensing technology and those working on social and environmental issues Spatially Integrated Social Science Michael F. Goodchild, Donald G. Janelle, 2004-01-15 Spatial analysis assists theoretical understanding and empirical testing in the social sciences and rapidly expanding applications of geographic information technologies have advanced the spatial data gathering needed for spatial analysis and model making This much needed volume covers outstanding examples of spatial thinking in the social sciences with each chapter showing some aspect of how certain social processes can be understood by analyzing their spatial context The audience for this work is as trans disciplinary as its authorship because it contains approaches and methodologies useful to geography anthropology history political science economics criminology sociology and statistics **The SAGE Handbook of Remote Sensing** Timothy A Warner, M Duane Nellis, Giles M Foody, 2009-06-18 A magnificent achievement A who's who of contemporary remote sensing have produced an engaging wide ranging and scholarly review of the field in just one volume Professor Paul Curran Vice Chancellor Bournemouth University Remote Sensing acquires and interprets small or large scale data about the Earth from a distance Using a wide range of spatial spectral temporal and radiometric scales Remote Sensing is a large and diverse field for which this Handbook will be the key research reference Organized in four key sections Interactions of Electromagnetic Radiation with the Terrestrial Environment chapters on Visible Near IR and Shortwave IR Middle IR 3-5 micrometers Thermal IR Microwave Digital sensors and Image Characteristics chapters on Sensor Technology Coarse Spatial Resolution Optical Sensors Medium Spatial Resolution Optical Sensors Fine Spatial Resolution Optical Sensors Video Imaging and Multispectral Digital Photography Hyperspectral Sensors Radar and Passive Microwave Sensors Lidar Remote Sensing Analysis Design and Implementation chapters on Image Pre Processing Ground Data Collection Integration with GIS Quantitative Models in Remote Sensing Validation and accuracy assessment Remote Sensing Analysis Applications LITHOSPHERIC SCIENCES chapters on Topography Geology Soils PLANT SCIENCES Vegetation Agriculture HYDROSPHERIC and CRYOSPHERIC SCIENCES Hydrosphere Fresh and Ocean Water Cryosphere GLOBAL CHANGE AND

Understanding Society and Natural Resources Michael J. Manfredo, Jerry J. Vaske, Andreas Rechkemmer, Esther A. Duke, 2014-06-11 In this edited open access book leading scholars from different disciplinary backgrounds wrestle with social science integration opportunities and challenges This book explores the growing concern of how best to achieve effective integration of the social science disciplines as a means for furthering natural resource social science and environmental problem solving The chapters provide an overview of the history vision advances examples and methods that could lead to integration The quest for integration among the social sciences is not new Some argue that the social sciences have lagged in their advancements and contributions to society due to their inability to address integration related issues Integration merits debate for a number of reasons First natural resource issues are complex and are affected by multiple proximate driving social factors Single disciplinary studies focused at one level are unlikely to provide explanations that represent this complexity and are limited in their ability to inform policy recommendations Complex problems are best explored across disciplines that examine social ecological phenomenon from different scales Second multi disciplinary initiatives such as those with physical and biological scientists are necessary to understand the scope of the social sciences Too frequently there is a belief that one social scientist on a multi disciplinary team provides adequate social science representation Third more complete models of human behavior will be achieved through a synthesis of diverse social science perspectives

Geography in America at the Dawn of the 21st Century Gary L. Gaile, Cort J. Willmott, 2005 Geography in America at the Dawn of the 21st Century surveys American geographers current research in their specialty areas and tracks trends and innovations in the many subfields of geography As such it is both a state of the discipline assessment and a topical reference It includes an introduction by the editors and 47 chapters each on a specific specialty The authors of each chapter were chosen by their specialty group of the American Association of Geographers AAG Based on a process of review and revision the chapters in this volume have become truly representative of the recent scholarship of American geographers While it focuses on work since 1990 it additionally includes related prior work and work by non American geographers The initial Geography in America was published in 1989 and has become a benchmark reference of American geographical research during the 1980s This latest volume is completely new and features a preface written by the eminent geographer Gilbert White
