

PULLMAX

P3

Totally enclosed, 1 h.p. electric motor, connected to the mechanism by means of a flexible coupling. Two striking rates — 1400 and 2800 strokes per min. — by turning the control lever to the right or left respectively. All PULLMAX cutting and forming operations can be performed. The lengths of stroke make this machine particularly suitable for use in sheet-metal shops, experimental and development workshops, schools, etc.

PULLMAX

P5

Totally enclosed, 2 h.p. electric motor, connected to the mechanism by means of a flexible coupling. Two striking rates — 1400 and 2800 strokes per min. — by turning the control lever to the right or left respectively. All standard PULLMAX operations can be performed. The machine has the same excellent characteristics as the PULLMAX P3, but is stronger and thus covers a greater working range, which is particularly advantageous for forming operations. This type of machine is frequently used in the aircraft and automotive industries and by manufacturers of restaurant and dairy utensils, etc. A popular machine for trade schools and repair shops.

PULLMAX

P6

Totally enclosed, two-speed, 2.5/2.3 h. p. electric motor. "V"-belt transmission. With the aid of an intermediate eccentric in combination with different settings of the control lever, 6 different stroke lengths can be set at the rate of 500, 1000 or 2000 strokes per minute. This machine has been designed especially in view of the increasing need for nibbling, for instance in the production of instrument panels. It is recommended not only for all standard PULLMAX operations but also for use together with the PULLMAX coordinate table.

PULLMAX

P8

Totally enclosed, two-speed, 3.5/3.0 h. p. electric motor. "V"-belt transmission. The intermediate eccentric, in combination with different control lever settings, gives 8 different stroke lengths at the rate of 500, 1000 or 2000 strokes per minute. All PULLMAX plate-working operations can be performed with this machine, which is also suitable for use together with the PULLMAX coordinate table. An extra powerful, heavy-duty machine, capable of withstanding heavy production loads.

PULLMAX

P9

Totally enclosed, two-speed, 5.5/4.5 h. p. electric motor. "V"-belt transmission. 10 different stroke lengths at striking rates of 500, 1000 or 2000 strokes per minute can be obtained by means of the intermediate eccentric, in combination with different control lever settings. The PULLMAX P9 incorporates all the operational features of PULLMAX universal machines and also covers the field of heavier plate-working. Like the PULLMAX P6 and the PULLMAX P8, it is particularly suitable for forming operations and nibbling. The PULLMAX P9 has proved to be particularly suitable for shipyards, iron and steel works, manufacturers of mechanical handling equipment, makers of chemical plant equipment, etc.
