In this volume the author challenges a number of widely held cultural stereotypes about India Caste is not as old as Indian civilization itself and current changes are no more radical than in the past for caste has evolved throughout its history It is not a colonial invention nor does it result from weak state control There is no single form of Indian kingship and power relations fundamental as they are for understanding Indian society Nor do Indian villages conform to a single type and caste is as much urban as rural Only in a regional local perspective can we view it as a system Caste does offer space for the individual though in a particular Indian mould and Hinduism does not provide for an integration of castes through ritual In short social organization varies widely in India and cannot provide the key to the specificity of caste This must be sought in the way society is imagined the models of society current in Indian thought Of course as mentioned above there is no single model Brahmins kings and merchants among others have all produced alternative models with themselves at the centre vying for hegemony while facing contesting models held by subalterns Still a hierarchical mode of thought is hegemonic and largely explains why Indians see their social stratification differently from people in the West The volume will be indispensable for scholars of South Asian Sociology and Culture [French books in print, anglais](#) Electre, 2002
