Fast Forward Melanne Verveer, Kim K. Azzarelli, 2015-10-06 This book based on interviews with the world's most inspiring women shows every woman how she can empower herself and her community. Madeleine Albright's important conversations about leaning in, work-life balance, and empowering females around the world have energized a generation of women. *Fast Forward* by two leaders whose experience spans corporate America, public service, and global diplomacy takes the next step. Through interviews with a network of more than seventy trailblazing women, *Fast Forward* shows women how to accelerate their growing economic power and combine it with purpose to find both success and meaning in their lives. Companies, countries, and organizations the world over are waking up to today's new reality. Women control the lion's share of purchasing power and are increasingly essential to competitiveness. The age of women's transformative economic influence has finally arrived, and women are using their power for purpose, redefining what power and success mean in the process. Through clear, practical advice and personal stories of women around the world, including Hillary Clinton, Geena Davis, Christine Lagarde, and Diane von Furstenberg, *Fast Forward* shows every woman how to know her power, find her purpose, and connect with others to achieve her life goals.

China Fast Forward Bill Dodson, 2012-07-25 Will China Surpass the United States as an innovation nation? China is tirelessly working to overcome its technological deficiencies by driving R&D initiatives in government and business and adapting Western Internet platforms for domestic use. It is extending its technological reach through a major drive to rival India as a services outsourcing leader and projecting its high-tech brands into the companies and homes of other countries. But whether China succeeds will depend on how it handles such issues as demography, energy dependency, and resource limitations. The environmental challenges posed by China's vast manufacturing sector are well documented, but what isn't widely realized is that China is actually outstripping the West in all manner of green initiatives: renewable energy, investments, research, and development funding, and other areas essential to improving the health of the planet. However, omnipresent government intervention, environmental degradation, natural resource exhaustion, and other issues threaten to derail China's rise to superpower status. As the country meets global challenges on a scale that few nations can match, *China Fast Forward* takes a look at what lies ahead and why China's success is important to us all. In this book, Bill Dodson explores China's reincarnation from a closed agrarian nation into a modern high-tech superpower bent on literally cleaning up its act. Presents an on-the-ground survey and analysis of China's renewable and clean energy sector that identifies the kinds of projects and technologies Chinese enterprises and local governments are hungry for. Includes a discussion on how successful Chinese companies are developing their brands to go head-to-head with the world's best-known companies. Discusses how

central government conflicts of interest are actually foiling corporate and official drives to innovation across a range of sectors Taking a look inside China's march toward becoming a sustainable superpower through innovation China Fast Forward presents a balance sheet of the country's technological and social progress on its path to becoming a world leader
