The Art of Classic Planning Nir Haim Buras, 2020-01-28 An accomplished architect and urbanist goes back to the roots of what makes cities attractive and livable demonstrating how we can restore function and beauty to our urban spaces for the long term Nearly everything we treasure in the world s most beautiful cities was built over a century ago Cities like Prague Paris and Lisbon draw millions of visitors from around the world because of their exquisite architecture walkable neighborhoods and human scale Yet a great deal of the knowledge and practice behind successful city planning has been abandoned over the last hundred years not because of traffic population growth or other practical hurdles but because of ill considered theories emerging from Modernism and reactions to it The errors of urban design over the last century are too great not to question The solutions being offered today sustainability walkability smart and green technologies hint at what has been lost and what may be regained but they remain piecemeal and superficial In *The Art of Classic Planning* architect and planner Nir Haim Buras documents and extends the time tested and holistic practices that held sway before the reign of Modernism With hundreds of full color illustrations and photographs that will captivate architects planners administrators and developers *The Art of Classic Planning* restores and revitalizes the foundations of urban planning Inspired by venerable cities like Kyoto Vienna and Venice and by the great successes of L Enfant s Washington Haussmann s Paris and Burnham s Chicago Buras combines theory and a host of examples to arrive at clear guidelines for best practices in classic planning for today s world *The Art of Classic Planning* celebrates the enduring principles of urban design and invites us to return to building beautiful cities

The Sustainable Urban Design Handbook Nico Larco, Kaarin Knudson, 2024-04-30 *The Sustainable Urban Design Handbook* gathers the best sustainability practices and latest research from the fields of architecture landscape architecture planning development ecology and environmental engineering and presents them in a graphically rich and accessible format that can help guide urban design decisions in cities of all sizes The book presents a comprehensive framework that organizes more than 50 elements of sustainable urban design under five main topics Energy Use Greenhouse Gas Water Ecology Habitat Energy Use Production and Equity Health and relative to four project scales Region City District Neighborhood Block Street and Project Parcel Each element chapter includes a summary of importance and background compares typical practices and recommended approaches explains connections to other elements and concludes with urban design guidelines that can be used to directly inform projects and decisions Easy to use and reference *The Sustainable Urban Design Handbook* provides both an in depth introduction to topics across sustainable urban design and serves as an on going reference for anyone involved in the creation of sustainable

urban environments This resource will be useful to design and planning professionals community members students and elected officials in guiding decisions about our sustainable future **Government Intervention and Suburban Sprawl**

Michael Lewyn,2017-01-20 This book shows how suburban sprawl is at least partially a consequence of government spending and regulation and suggests anti sprawl policies that can make government smaller and or less intrusive Thus the book responds to the widely held view that automobile dependent suburban development also known as suburban sprawl is a natural result of the free market and of affluence and accordingly cannot be altered without massive government regulation

Site Matters Andrea Kahn,Carol J. Burns,2020-12-21 In the era of the Anthropocene site matters are more pressing than ever Building on the concepts theories and multi disciplinary approaches raised in the first edition this publication strives to address the changes that have taken place over the last 15 years with new material to complement and re position the initial volume Reaching across design disciplines this highly illustrated anthology assembles essays from architects landscape architects urban designers planners historians and artists to explore ways to physically and conceptually engage site Thoughtful discourse and empirically grounded pieces combine to provide the language and theory to contextualize the meanings of site in the built environment The increasingly complex hybridity of constructed environments today demands new tools for thinking about and working with site Drawing contributions from outside and within the traditional design disciplines this edition will trace important developments in site thinking with new essays on topics such as climate change landscape as infrastructure shifts from global to planetary urbanization debates and the proliferation of participatory site transformation practices Edited by two leading practitioners and academics *Site Matters* juxtaposes timeless contributions from individuals including Elizabeth Meyer Robert Beauregard and Robin Dripps with original new writings from Peter Marcuse Jane Wolff Neil Brenner and Thaisa Way amongst others to recontextualize and reignite the debate around site An ideal text for students academics and researchers interested in site and design theory **The Palgrave Encyclopedia of**

Urban and Regional Futures Robert C. Brears,2023-01-13 While urban settlements are the drivers of the global economy and centres of learning culture and innovation and nations rely on competitive dynamic regions for their economic social and environmental objectives urban centres and regions face a myriad of challenges that impact the ways in which people live and work create wealth and interact and connect with places Rapid urbanisation is resulting in urban sprawl rising emissions urban poverty and high unemployment rates housing affordability issues lack of urban investment low urban financial and governance capacities rising inequality and urban crimes environmental degradation increasing vulnerability to natural disasters and so forth At the regional level low employment low wage growth scarce financial resources climate change waste and pollution and rising urban peri urban competition etc are impacting the ability of regions to meet socio economic development goals while protecting biodiversity The response to these challenges has typically been the application of inadequate or piecemeal solutions often as a result of fragmented decision making and competing priorities with numerous

economic environmental and social consequences In response there is a growing movement towards viewing cities and regions as complex and sociotechnical in nature with people and communities interacting with one another and with objects such as roads buildings transport links etc within a range of urban and regional settings or contexts This comprehensive MRW will provide readers with expert interdisciplinary knowledge on how urban centres and regions in locations of varying climates lifestyles income levels and stages development are creating synergies and reducing trade offs in the development of resilient resource efficient environmentally friendly liveable socially equitable integrated and technology enabled centres and regions
