Rexton Hearing Aids User Guide:

The Praeger Guide to Hearing and Hearing Loss Susan Dalebout, 2008-12-30 More than 31 million people in the United States alone suffer from hearing loss that is one in every 10 people in the current population Of those only five to 10 percent can be treated medically leaving the largest number in need of other solutions It is for those people that veteran audiologist Susan Dalebout wrote this comprehensive guide The book explains with a simple overview of hearing anatomy and physiology how we hear and details hearing evaluation tests the interpretation of those tests and the conditions that most commonly cause hearing loss in adults All things related to adult hearing loss are explained as is a full menu of hearing rehabilitation services devices and technology This text includes discussion of the importance of hearing in our lives the psychological social and emotional effects of untreated hearing loss and the effects on family members and friends Also included is a chapter on prevention describing the dangers of exposure to hazardous noise and certain drugs and how to protect against damage to hearing Unique for its breadth and depth this text also offers detail on hearing aids care and maintenance as well as factors to consider when purchasing an aid cochlear implants hearing assistance technology and future trends in hearing restoration

Shouting Won't Help Katherine Bouton, 2013-02-19 For twenty two years Katherine Bouton had a secret that grew harder to keep every day An editor at The New York Times at daily editorial meetings she couldn't hear what her colleagues were saying She had gone profoundly deaf in her left ear her right was getting worse As she once put it she was the kind of person who might have used an ear trumpet in the nineteenth century Audiologists agree that we're experiencing a national epidemic of hearing impairment At present 50 million Americans suffer some degree of hearing loss 17 percent of the population And hearing loss is not exclusively a product of growing old The usual onset is between the ages of nineteen and forty four and in many cases the cause is unknown *Shouting Won't Help* is a deftly written deeply felt look at a widespread and misunderstood phenomenon In the style of Jerome Groopman and Atul Gawande and using her experience as a guide Bouton examines the problem personally psychologically and physiologically She speaks with doctors audiologists and neurobiologists and with a variety of people afflicted with midlife hearing loss braiding their stories with her own to illuminate the startling effects of the condition The result is a surprisingly engaging account of what it's like to live with an invisible disability and a robust prescription for our nation's increasing problem with deafness A Kirkus Reviews Best Nonfiction Book of 2013
