Probabilistic Reasoning In Multiagent Systems A Graphical Models Approach:

Probabilistic Reasoning in Multiagent Systems Yang Xiang, 2002-08-26 This 2002 book investigates the opportunities in building intelligent decision support systems offered by multi agent distributed probabilistic reasoning Probabilistic reasoning with graphical models also known as Bayesian networks or belief networks has become increasingly an active field of research and practice in artificial intelligence operations research and statistics The success of this technique in modeling intelligent decision support systems under the centralized and single agent paradigm has been striking Yang Xiang extends graphical dependence models to the distributed and multi agent paradigm He identifies the major technical challenges involved in such an endeavor and presents the results The framework developed in the book allows distributed representation of uncertain knowledge on a large and complex environment embedded in multiple cooperative agents and effective exact and distributed probabilistic inference

Advances in Probabilistic Graphical Models Peter Lucas, José A. Gámez, Antonio Salmerón Cerdan, 2007-06-12 In recent years considerable progress has been made in the area of probabilistic graphical models in particular Bayesian networks and influence diagrams Probabilistic graphical models have become mainstream in the area of uncertainty in artificial intelligence contributions to the area are coming from computer science mathematics statistics and engineering This carefully edited book brings together in one volume some of the most important topics of current research in probabilistic graphical modelling learning from data and probabilistic inference This includes topics such as the characterisation of conditional independence the sensitivity of the underlying probability distribution of a Bayesian network to variation in its parameters the learning of graphical models with latent variables and extensions to the influence diagram formalism In addition attention is given to important application fields of probabilistic graphical models such as the control of vehicles bioinformatics and medicine

Logic, Language, and Computation Balder D. ten Cate, Henk W. Zeevat, 2007-09-17 Edited in collaboration with FoLLI the Association of Logic Language and Information this book represents the thoroughly refereed post proceedings of the 6th International Tbilisi Symposium on Logic Language and Computation TbiLLC 2005 held in Batumi Georgia The 19 revised full papers presented were carefully reviewed and selected from numerous presentations at the symposium The papers present current research in all aspects of linguistics logic and computation

Recent Advances in Maintenance and Infrastructure Management Roberto Davide Cigolini, Abhijit V. Deshmukh, Lorenzo Fedele, Sara Ann McComb, 2009-03-18 Recent Advances in Maintenance and Infrastructure Management is a collection of papers highlighting the state of the art in maintenance of large structures and management of infrastructures The papers selected in this book are written by international experts from academia and industry and were presented during the past three International Conference on Maintenance Management MM Conferences held from 2005 to 2007 and organized by CNIM Italian National Committee for Maintenance The selected papers are categorized into four thematic areas 1 reliability and maintenance 2 mathematical modeling and metrics for maintenance 3

maintenance management and organization and 4 facilities management and contracting The papers cover topics ranging from embedded sensors for diagnostics of structures to organizational issues related to effective maintenance planning Recent Advances in Maintenance and Infrastructure Management provides readers with a snapshot of the latest developments in the tools and techniques used to conduct maintenance of complex infrastructures and systems The book will be of interest to researchers and practitioners in academia and industry involved in planning and deployment of maintenance operations Additionally this can serve as a reference text for advanced courses in operations management and structural health monitoring The Semantic Web: Research and Applications York Sure, John Domingue, 2006-06-01 This book constitutes the refereed proceedings of the 3rd European Semantic Web Conference ESWC 2006 The book presents 48 revised full papers with abstracts of 3 invited talks The papers are organized in topical sections on ontology alignment engineering evaluation evolution and learning rules and reasoning searching and querying semantic annotation semantic web mining and personalisation semantic web services semantic wiki and blogging as well as trust and policies
