

Probability Project: Design Your Own Board Game

In this assignment, you will be designing your own board game in groups of 2. Your game cannot be a copy of a game that already exists; you must create your own unique game. Your game does not need to be fair, but it must be honest. You will be required to discuss the probabilities of your board game. Your game must use probability in at least 3 DIFFERENT ways (think dice, spinner, drawing cards, flipping coins, etc)

Final Product:

- **Game:** Include all game boards, playing pieces, cards, dice, spinners, etc
- **Instructions:** You must create a set of, written or typed, rules to explain your game. They must be easy to follow so that anyone can pick them up and play
- **Write up:** See below (Each member must create their own)

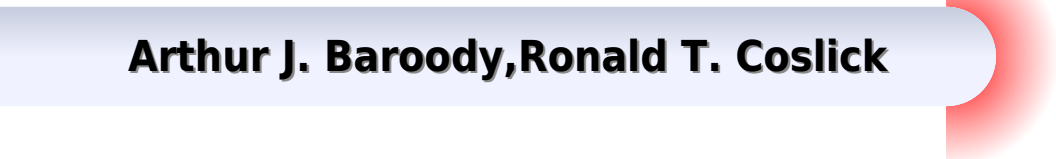

Grading / Assessment: *See Rubric

The Write Up:

- **Introduction** – Provide a basic overview of your game
 - o What type of game is it?
 - o Why should I play your game?
 - o How is it different than other board games?
- **Instructions** – Step-by-Step instructions on how to play your game (this counts toward the final product)
- **Game Description** – What do you need to play the game?
 - o List all the materials needed to play (dice, spinner, pieces, etc)
 - o An initial design (sketch) of your board game – this will serve to help in its construction
- **Probability Analysis**
 - o A brief outline (think one paragraph) that discusses how each of the different probabilities are used in your board game.
 - My dice is 20 sided, therefore when I roll it there is a 1/20 chance or a 5% chance.
 - My spinner has numbers, between 1-10, but is also coloured. Etc.
 - o What are the theoretical probabilities involved in your game? (Include ALL of them, as well as all of their respective outcomes)
 - When playing / testing your game, does the experimental / actual probability match the theoretical? Alternatively, is it different?
 - o Is the game fair or unfair? Explain how you know. If your game is unfair, how could it be changed to make it fair?
