Retroperitoneoscopy And Extraperitoneal Laparoscopy In Pediatric And Adult Urology:

Retroperitoneoscopy and Extraperitoneal Laparoscopy in Pediatric and Adult Urology Paolo Caione, Louis R.

Kavoussi, Francesco Micali, 2013-04-17 Laparoscopy is a new frontier of the surgical technique which recently gained more and more popularity and credit upon the surgical teams also in Urology. The reason stays in the reduced invasivity and in the advances on the techniques of video assisted surgery. More recently the retroperitoneal access to laparoscopy surgery retroperitoneoscopy or retroperitoneal laparoscopy opened a new surgical approach to several diagnostic and operative procedures for a large number of urogenital tract diseases. The applications in pediatric and in adult age and the technical challenges are widely debated at the moment. The volume gathers contributions by internationally renowned authors and is a complete overview of the technique. The book addresses urologists general and abdominal surgeons pediatric urologists and pediatric surgeons who are interested in minimally invasive procedures and particularly in retroperitoneal laparoscopy.

Endoscopic Surgery of the Potential Anatomical Spaces F. Rulli, Attilio Maria Farinon, 2005-12-05 Potential anatomical spaces have attracted surgeons in the past and in recent years. Due to the development of modern imaging techniques and the advent of minimally invasive surgery access to these spaces has become a real surgical option. The purpose of this book is to document the challenges related to potential anatomical spaces traditionally described as hidden spaces. The spread of video assisted surgery and its application in the management of diseases involving organs or anatomical structures placed in the potential spaces neck mediastinum pro peritoneum and retro peritoneum subfacial space of the leg and axilla has rendered their surgical anatomy less abstract. Pediatric Urology Duncan T. Wilcox, Prasad P.
