Understanding and Working with Shame Carsten René Jørgensen,2024-11-26 This book discusses the pivotal role of shame in a wide range of mental disorders and as a driving force in societal polarization and escalating conflicts between nations and population groups Exploring the phenomenology of one of the most vulnerable and painful of human emotions shame J rgensen dives deep into its many facets and the ways in which it manifests in mental illnesses and everyday life Delving into an in depth discussion of the differentiation between the moral and ethical feelings of guilt and shame he presses the need to distinguish between constructive and destructive feelings of shame He examines how shame permeates societal and cultural expectations on both individual and collective levels Solution centric in its approach the author not only discusses the destructive feelings of shame particularly common among individuals with more severe mental disorders but also offers specific advice to therapists on how to deal with it The book will be an essential read for psychoanalysts psychotherapists philosophers and anyone wanting to understand the power of shame in our lives **A Web of Sorrow**

Salman Akhtar,2018-03-26 Bringing together the experiences of mistrust jealousy lack of love shamelessness regret and despair this far reaching book elucidates human sorrow in striking sociocultural and clinical details **Mistrust** Salman Akhtar,2018-03-26 Humans are weak Lacking the claws and thick skins of other animals we are forced to rely on members of our own species to survive and flourish in the world The fact that the human infant is born in an utterly helpless state also makes others protective care necessary Attachment bonding concern and mutuality thus become cornerstones of human existence Trust also enters this equation Originating in the early mother child relationship trust continues to grow get contextually refined tempered by reality testing and gain nuances throughout the subsequent adult life Its absence mistrust or malformation distrust contributes to psychopathology and is responsible for much intrapsychic distress and interpersonal strife Given its formative significance and its crucial role in the therapeutic process one is surprised by the paucity of psychoanalytic writings specifically devoted to the topic of trust and mistrust Few if any monographs on trust exist A collection of essays written specifically for this volume it deals with the ontogenesis psychopathology cultural vicissitudes and technical implications of trust and mistrust **War Is Not Inevitable** Henri Parens,2014-07-22 In 1932 Einstein asked Freud Is there any way of delivering mankind from the menace of war Freud answered that war is inevitable because humans

have an instinct to self destroy a death instinct which we must externalize to survive But nearly four decades of study of aggression reveal that rather than being an inborn drive destructiveness is generated in us by experiences of excessive psychic pain In War is Not Inevitable On the Psychology of War and Aggression Henri Parens argues that the death instinct based model of aggression can neither be proved nor disproved as Freud s answer is untestable By contrast the multi trends theory of aggression is provable and has greater heuristic value than does a death instinct based model of aggression When we look for causes for war we turn to history as well as national ethnic territorial and or political issues among many others but we also tend to ignore the psychological factors that play a large role Parens discusses such psychological factors that seem to lead large groups into conflict Central among these are the psychodynamics of large group narcissism Interactional conditions stand out hyper narcissistic large groups have in history caused much narcissistic injury to those they believe they are superior to But this is commonly followed by the narcissistically injured group s experiencing high level hostile destructiveness toward their injury perpetrator which in time will compel them to revenge Among groups that have been engaged in serial conflicts wars have followed from this psychodynamic narcissism based cyclicity Parens details some of the psychodynamics that led from World War I to World War II and their respective aftermath and he addresses how major factors that gave rise to these wars must can and have been counteracted In doing so Parens considers strategies by which civilization has and is constructively preventing wars as well as the need for further innovative efforts to achieve that end

Slings and Arrows Jerome David Levin,1995-04-01 Levin examines what therapists can do to help the victims of narcissistic wounds to integrate mourn and heal them He shows the nature of the injuries to each party and considers ways to minimize them since treatment itself can seem an injury to both patient and therapist [Introduction to Computational Cultural Psychology](#) Yair Neuman,2014-02-06 Human psychology is deeply rooted in the culture in which people live [Introduction to Computational Cultural Psychology](#) introduces a revolutionary approach for studying cultural psychology Drawing on novel computational tools and in depth case studies Professor Yair Neuman offers thought provoking answers to questions such as how are thought and language deeply related How can computers help us to understand different cultures How can computers assist military intelligence in identifying vengeful intentions And how is our concept of love rooted in our basic embodied experience Written by a leading interdisciplinary researcher this book is a tour de force which will be of interest to a variety of researchers students and practitioners in psychology as well as an interdisciplinary audience with an interest in the intricate web weaved between the human psyche and its cultural context
