Rethinking Womens Health A Guide To Wellness:

BIPOC and LGBTQ Feminist Radical Visionaries Jasmine A. Mena, Delishia M. Pittman, 2024-04-04 Black Indigenous and People of Color BIPOC and Lesbian Gay Bisexual Transgender and Queer LGBTQ feminist visionaries have contributed to a paradigm shift in feminist theory and practice by espousing an intersectional and inclusive conceptualization of liberation. This book honors the journeys and contributions of seven feminist visionaries who share some of their most formative experiences and challenges that fomented a desire for equity justice and collective wellbeing. The transformations to feminism psychology psychotherapy and other areas following their immeasurable contributions are vast and have produced enduring changes. The chapters in this volume also offer their reflections and wisdom about what remains unfinished in service to building an equitable and just society. These deep and critical reflections serve as an excellent resource for anyone seeking to increase their awareness of equity and justice in psychology. Readers will also have a view into how it is that lived experiences inform intellectual and professional pursuits and vice versa. This book will serve as an exceptional accompaniment to any course aiming to expose students to these indispensable perspectives which are at once personal and undoubtedly professional. The chapters in this book were originally published as a special issue of *Women Therapy*.

How to Rethink Mental Illness Bernard Guerin, 2017-03-16 The world of mental illness is typically framed around symptoms and cures where every client is given a label. In this challenging new book Professor Bernard Guerin provides a fresh alternative to considering these issues based in interdisciplinary social sciences and discourse analysis rather than medical studies or cognitive metaphors. A timely and articulate challenge to mainstream approaches Guerin asks the reader to observe the ecological contexts for behavior rather than diagnose symptoms to find new ways to understand and help those experiencing mental distress. This book shows the reader how we attribute mental illness to someone's behavior why we call some forms of suffering mental but not others what Western diagnoses look like when you strip away the theory and categories why psychiatry and psychology appeared for the first time at the start of modernity the relationship between capitalism and modern ideas of mental illness why it seems that women the poor and people of Indigenous and non Western backgrounds have worse mental health how we can rethink the hearing of voices more ecologically how self identity has evolved historically how thinking arises from our social contexts rather than from inside our heads. Offering solutions rather than theory to develop a new post internal psychology *How to Rethink Mental Illness* will be essential reading for every mental health professional as well as anyone who has either experienced a mental illness themselves or helped a friend or family member who has.

Challenges in Older Women's Health Heidi W. Brown, Makeba Williams, Sarina Schrager, 2021-06-08 The number of Americans 65 years of age or older is projected to more than double to over 98 million by 2060 making them 24% of the overall population. Women constitute more than 50% of this group. Most clinicians who provide primary care for older women receive minimal training about their unique health issues and needs during residency however and few

resources exist to guide them regarding these issues in practice This book provides user friendly evidence based guidance to manage common challenges in healthcare for women during menopause and beyond filling a huge and growing unmet need for primary care clinicians Edited by a multidisciplinary team with content expert authors from family medicine oncology urogynecology obstetrics and gynecology psychology and more this text provides clinically relevant information about important conditions impacting the health of older women including suggested guidelines for management and helpful resources for patient counselling and care The first half of the book covers general topics such as menopause bone health depression and grief cancer survivorship and obesity The second half focuses on issues below the belt that are difficult to talk about such as incontinence vulvar pathology and sexual health after menopause While there is copious literature about the menopausal transition few resources for clinicians exist about caring for women beyond the 6th decade Challenges in Older Women s Health A primer for clinicians provides focused evidence based information about high yield topics for a too often neglected group of patients
