Case Studies in Retrofitting Suburbia June Williamson, Ellen Dunham-Jones, 2021-01-05 A brand new collection of 32 case studies that further demonstrate the retrofitting of suburbia This amply illustrated book second in a series documents how defunct shopping malls parking lots and the past century's other obsolete suburban development patterns are being retrofitted to address current urgent challenges they weren't designed for improving public health increasing resilience in the face of climate change leveraging social capital for equity supporting an aging society competing for jobs and disrupting automobile dependence Case Studies in Retrofitting Suburbia Urban Design Strategies for Urgent Challenges provides summaries data and references on how these challenges manifest in suburbia and discussion of successful urban design strategies to address them in Part I Part II documents how innovative design strategies are implemented in a range of northern American contexts and market conditions From modest interventions with big ripple effects to ambitious do overs examples of redevelopment

reinhabitation and greening of changing suburban places from coast to coast are described in depth in 32 brand new case studies Written by the authors of the highly influential Retrofitting Suburbia Urban Design Solutions for Redesigning Suburbs Demonstrates changes that can and already have been realized in suburbia by focusing on case studies of retrofitted suburban places Illustrated in full color with photos maps plans and diagrams Full of replicable lessons and creative responses to ongoing problems and potentials with conventional suburban form Case Studies in Retrofitting Suburbia Urban Design Strategies for Urgent Challenges is an important book for students and professionals involved in urban design architecture landscape architecture urban planning development civil engineering public health public policy and governance Most of all it is intended as a useful guide for anyone who seeks to inspire revitalization justice and shared prosperity in places they know and care about

Sprawl Repair Manual Galina Tachieva, 2010-09-14 Sprawl Repair Manual demonstrates a step by step design process for the re balancing and re urbanization of suburbia into more sustainable economical energy and resource efficient patterns As Galina Tachieva asserts in this exceptionally useful book sprawl repair will require a proactive and aggressive approach focused on design regulation and incentives Sprawl Repair Manual draws on more than two decades of practical experience in the field of repairing and building communities to analyze the current pattern of sprawl development disassemble it into its elemental components and present a process for transforming them into human scale sustainable elements The techniques are illustrated both two and three dimensionally providing users with clear methodologies for the sprawl repair interventions some of which are radical but all of which will produce positive results

Designing Suburban Futures June Williamson, 2013-05-07 Suburbs deserve a better more resilient future June Williamson shows that suburbs aren't destined to remain filled with strip malls and excess parking lots they can be reinvigorated through inventive design Drawing on award winning design ideas for revitalizing Long Island she offers valuable models not only for U S suburbs but also those emerging elsewhere with global urbanization Williamson argues that suburbia has historically been a site of great experimentation and is currently primed for exciting changes Today dead malls aging office parks and blighted apartment complexes are being retrofitted into walkable sustainable communities Williamson shows how to expand this trend highlighting promising design strategies and tactics She provides a broad vision of suburban reform based on the best schemes submitted in Long Island's highly successful Build a Better Burb competition Many of the design ideas and plans operate at a regional scale tackling systems such as transit aquifer protection and power generation While some seek to fundamentally transform development patterns others work with existing infrastructure to create mixed use shared networks Designing Suburban Futures offers concrete but visionary strategies to take the sprawl out of suburbia creating a vibrant new suburban form It will be especially useful for urban designers architects landscape architects land use planners local policymakers and NGOs citizen activists students of urban design planning architecture and landscape architecture

The New Suburbia Becky M. Nicolaides, 2024 The New Suburbia explores how the suburbs

transformed from bastions of the white middle class in the postwar years into diverse communities after 1970 In the new suburbia white advantage persisted but it existed alongside rising inequality ethnic and racial diversity and new household configurations It focuses on Los Angeles at the vanguard of these trends

Urban Transformations Nicholas Wise, Julie Clark, 2017-06-14 Economic restructuring and demographic change have in recent years placed much strain on urban areas with the effects falling disproportionately on neighbourhoods that were previously underpinned by industry and manufacturing This has presented policy makers and city planners with a binary choice to resist change and stagnate or to change and attempt to keep up with the pace of global demand This edited book tells the story of how urban transformation impacts on people's lives and everyday interactions to question where and to whom benefit accrues from these changes Urban Transformations offers insight into both risk and reward as local communities and public authorities creatively address the challenge of building vital and sustainable urban environments The authors in this edited collection argue that understanding the specifics of community space and place is crucial to delivering insights into how where when why and for whom urban areas might successfully transform The chapters investigate urban change using a range of approaches and case studies from the four corners of the Earth from the United States to Iran from the United Kingdom to Canada The varying scales at which governance or regeneration initiatives operate the nature and composition of urban communities and the local or global interests of different private sector actors all raise questions for urban policy and practice It is important to not only consider the drivers of regeneration but its beneficiaries need to be identified This edited volume addresses and elaborates on critical issues facing urban transformation and renewal as a basis for future discussion on strategies for successful urban transformation

New Suburbanism: Sustainable Tall Building Development Kheir Al-Kodmany, 2016-04-14 Much of the anticipated future growth in the United States will take place in suburbia The critical challenge is how to accommodate this growth in a sustainable and resilient manner This book explores the role of suburban tall as a viable sustainable alternative to continued suburban sprawl It identifies 10 spatial patterns in which tall buildings have been integrated into the American suburbs The study concludes that the Tall Building and Transit Oriented Development TB TOD model is the most appropriate to promote sustainable suburbanism The findings are based on analyzing over 300 projects in 24 suburban communities within three major metropolitan areas including Washington DC Miami Florida and Chicago Illinois The book furnishes planning strategies that address the social economic and environmental aspects of sustainable tall building development It also discusses sustainable architectural design and site planning strategies and provides case studies of sustainable tall buildings that were successfully integrated into suburban settings

Designing for the Third Age Lorraine Farrelly, 2014-04-28 Highlights how architecture needs to rise to the challenge of a demographic revolution As people sixty five and older constitute an ever increasingly proportion of population in most industrialized nations the design of housing and other built provisions needs to be rethought in order to

accommodate this ever expanding ageing population How can far reaching architectural solutions play a key part by creating sustainable cities for the changing profile of the population reducing models of dependency for care and transport while creating opportunities for recreation leisure and work This issue reflects on the population challenges facing Europe Australia North America and Asia offering innovative responses to these problems on a practical and speculative level Addresses a major social issue for architects designers and students Includes contributions from Arup Global Foresight Innovation Baronness Greengross President of the International Longevity Centre UK Matthias Hollwich of HWKN Jerry Maltz of AIAN Design for Aging David Birbeck of Design for Homes Edward Denison Research Associate at University College London Kathryn Firth of the London Legacy Development Corporation Richard Mazuch of IBI Nightingale architect Walter Menteth author Jayne Merkel architect writer and researcher Terri Peters Anjali Raje Executive Director of International Longevity Centre India and architect Radhika Vaidya Robert Schmidt of the Adaptable Futures research group at Loughborough University Sally Stewart of Glasgow School of Architecture Mark Taylor of The University of Newcastle and Katherine Wilkinson of RMIT Features architects including Amie Gross Architects Ariktema Dattner Architects HWKN Deborah Gans Gans Studio JJW Architects Henning Larsen Architects Michael Maltzan Architecture nARCHITECTS Nord Architects PRP Architects and Yanmin Zhou
