Mobile Working Machines Marcus Geimer, 2020-12-31 Mobile Working Machines are defined by three characteristics. These machines have a certain task of doing a working process; they are mobile and they have a significant energy share in their working functions. The machines should be as productive, efficient and of high quality as possible. All these machines in the field of agriculture, forestry, construction, logistics, municipal sector and in other special applications work in different applications. But many technologies placed in the machines are the same, similar or comparable; therefore, different branches can learn from each other. Mobile Working Machines provides a wide and deep view into the technologies used in these machines. Appropriate for new engineers as well as those who wish to increase their knowledge in this field, this book brings together all the latest research and development into one place. **Experimental Hydrostatic Drive Vehicle** Terry A. Hartzell, 1996 **Enterprise IoT** Dirk Slama, Frank Puhlmann, Jim Morrish, Rishi M Bhatnagar, 2015-10-29 Current hype aside, the Internet of Things will ultimately become as fundamental as the Internet itself with lots of opportunities and trials along the way. To help you navigate these choppy waters, this practical guide introduces a dedicated methodology for businesses preparing to transition towards IoT-based business models. With a set of best practices based on case study analysis, expert interviews and the authors' own experience, the Ignite IoT Methodology outlined in this book delivers actionable guidelines to assist you with IoT strategy management and project execution. You'll also find a detailed case study of a project fully developed with this methodology. Hydrostatic transmissions and hydrostatic actuators are then examined in more detail with coverage of pumps and motors, hydrostatic solutions to single rod actuators, energy management and efficiency and dynamic response. Consideration is also given to current and emerging applications of hydrostatic transmissions and actuators in automobiles, mobile equipment, wind turbines, wave energy harvesting and airplanes. End of chapter exercises and real-world industrial examples are included throughout, and a companion website hosting a solution manual is also available. Copyright Office, 1968 **AB Bookman's Weekly** , 1998 Regional Industrial Buying Guide , 2000 *Dealing with Heritage* Barbara Lubelli, Uta Pottgiesser, Wido Quist, Susanne Rexroth, 2025-04-01 It is an honor to introduce this book which brings together a number of very important aspects of the restoration architect's profession with this short statement. Dealing with heritage requires that the restoration architect makes well considered and definable choices. It should not only be about conservation but attention must and may also be paid to making heritage future proof. When it comes to making heritage future proof we still stand at the start of a major sustainability transition in which making interventions will be indispensable. Such interventions are made possible by recognizing and utilizing the opportunities that heritage offers but they should always be made from a view that places the preservation of the core values of the heritage centrally. This book is part of a series of books produced in cooperation with and financed by the Stichting Rondeltappe Bernoster Kemmers. All books of the series have been reviewed and edited by Silvia Naldini, Section of Heritage Architecture, Faculty of Architecture and the Built Environment, Delft University of Technology, The Netherlands.
