The GP Trainer's Handbook Paul Middleton, Maurice Price, 2011 The ten years since the First Edition of this book have witnessed revolutionary changes in GP training appraisal the new MRCGP exam and competence based assessments to name but three Greater availability of information has also transformed the social context of General Practice as a profession Despite this the one to one relationship between trainer and trainee remains the lynchpin of GP education and this manual's key principle that GP trainers are the key source of expertise in this field and that their experiences and ideas are a vital and still underused resource is as important as ever This new edition fully revised and updated to reflect the latest changes in both GP training and the profession remains an essential comprehensive manual of useful advice for GP trainers written by their peers Outlining educational methods training philosophies and reflections from practitioners experienced in the entire spectrum of GP education it provides a tool box of resources to cover the practicalities of training including e portfolios teaching consultation skills and numerous tips and tricks It is now augmented with an array of supporting material that includes checklists forms and evaluation tools accessed electronically via a code supplied with the book This book is vital reading for GP tutors and GP trainers as well as those considering such roles and for all those who manage and oversee the training of GP registrars The next generation of GPs will face even more changes in the landscape of primary care and it has become even more imperative that we provide high quality training This manual will support this process from the Foreword by Steve Field
