Structure and Physics of Viruses Mauricio G. Mateu, 2013-06-04 This book contemplates the structure dynamics and physics of virus particles From the moment they come into existence by self assembly from viral components produced in the infected cell through their extracellular stage until they recognise and infect a new host cell and cease to exist by losing their physical integrity to start a new infectious cycle Bio physical techniques used to study the structure of virus particles and components and some applications of structure based studies of viruses are also contemplated This book is aimed first at M Sc students Ph D students and postdoctoral researchers with a university degree in biology chemistry physics or related scientific disciplines who share an interest or are actually working on viruses We have aimed also at providing an updated account of many important concepts techniques studies and applications in structural and physical virology for established scientists working on viruses irrespective of their physical chemical or biological background and their field of expertise We have not attempted to provide a collection of for experts only reviews focused mainly on the latest research in specific topics we have not generally assumed that the reader knows all of the jargon and all but the most recent and advanced results in each topic dealt with in this book In short we have attempted to write a book basic enough to be useful to M Sc and Ph D students as well as advanced and current enough to be useful to senior scientists with an interest in Structural and or Physical Virology

1st World Congress on Electroporation and Pulsed Electric Fields in Biology, Medicine and Food & Environmental Technologies Tomaz Jarm, Peter Kramar, 2015-08-31 This volume presents the proceedings of the 1st World Congress on Electroporation and Pulsed Electric Fields in Biology Medicine and Food Environmental Technologies WC2015 The congress took place in Portoro Slovenia during the week of September 6th to 10th 2015 The scientific part of the Congress covered different aspects of electroporation and related technologies and included the following main topics Application of pulsed electric fields technology in food challenges and opportunities Electrical impedance measurement for assessment of electroporation yield Electrochemistry and electroporation Electroporation meets electrostimulation Electrotechnologies for food and biomass treatment Food and biotechnology applications In vitro

electroporation basic mechanisms Interfacial behaviour of lipid assemblies membranes and cells in electric fields Irreversible electroporation in clinical use Medical applications electrochemotherapy Medical applications gene therapy Non electric field based physical methods inducing cell poration and enhanced molecule transfer Non thermal plasmas for food safety environmental applications and medical treatments PEF for the food industry fundamentals and applications PEF proce ss integration complex process chains and process combinations in the food industry Predictable animal models Pulsed electric fields and electroporation technologies in bioeconomy Veterinary medical applications **Animal-Origin Viral Zoonoses** Yashpal Singh Malik,Raj Kumar Singh,Kuldeep Dhama,2020-09-23 This book is the second volume in the series Livestock Diseases and Management and reviews the importance and implications of animal origin viral zoonoses It also highlights the specific etiology and epidemiology of these viral infections and discusses their various biological and mechanical transmission mechanisms Further the book reviews various measures for controlling viral zoonoses and examines novel therapeutic and prophylactic strategies Discussing recent studies on the pathogenesis and host immune response to these infections it underscores the importance of using vaccines against these viral diseases to reduce the risk of them being transmitted to humans Lastly it describes in detail the challenges posed by these viral infections and our readiness to face them
