Guide to Books in Print, 1996 **Principles of Macroeconomics Asia-Pacific Edition with Online Study Tool S 12 Months** Robin Ellen Stonecash, Jan Libich, Joshua Gans, Stephen King, N. Gregory Mankiw, Martin Byford, 2017-09-15. The brief and student friendly approach of this book boils economics down to its essentials by considering what is truly important for students to learn in their first course in economics. In keeping with the authors' philosophy of showing students the power of economic tools and the importance of economic ideas, this edition pays careful attention to regional and global policies and economic issues including the impacts of the ongoing global financial crisis, inflation, unemployment, interest rates and monetary and fiscal policy. Continuing global financial uncertainty and the current state of the Australian economy provide a constant supply of new material, re-evaluated models and policy changes and updates for the Principles of Macroeconomics text. The book emphasises the material that students should and do find interesting about the study of the economy, resulting in a focus on applications and policy and less on formal economic theory. Principles of Macroeconomics 7e encourages students to make their own judgements by presenting both sides of the debate on five controversial issues facing policymakers: the proper degree of policy activism in response to the business cycle; the choice between rules and discretion in the conduct of monetary policy; the desirability of reaching zero inflation; the importance of balancing the government's budget and the need for tax reform to encourage saving. *Media, Economy and Society* Christian Fuchs, 2023-11-29. This essential guide to the critical study of the media economy in society teaches students how to critically analyse the political economy of communication and the media. The book introduces a variety of methods and topics including the political economy of communication in capitalism; the political economy of media concentration; the political economy of advertising; the political economy of global media and transnational media corporations; class relations and working conditions in the capitalist media and communication industry; the political economy of the Internet and digital media; the information society and digital capitalism; the public sphere; Public Service Media; the Public Service Internet; and the political economy of media.
