PRINCIPLES OF
Paleontology

David M. Raup
Steven M. Stanley

Principles Of Paleontology

Nietsnie Trebla

Principles Of Paleontology:

Principles of Paleontology Michael Foote, Arnold I. Miller, 2007 Michael Foote and Arnold Miller have stepped in to revise this classic text. It is their vision to take the core approach of the second edition and reflect the substantial changes to the rudiments of the subject from the previous two decades. This third edition remains an excellent text for those studying geophysical sciences.

Principles of paleontology David M. Raup, Steven Mitchell Stanley, 1978 *Principles of Paleontology* David M. Raup, Steven M. Stanley, 1971-01-01

Nekton Yu.G. Alejev, 2012-12-06 1 Nekton as an ecomorphological type of biont. The term nekton was suggested and used for the first time in 1890 by E. Haeckel in his book *Plankton Studien*. Etymologically, the word nekton derives from the Greek $\nu\tau\kappa\tau\tau\iota\mu\epsilon\tau\alpha$ i.e. swimming. As Haeckel defined it, nekton describes collectively all swimming animals that are free to choose their path i.e. can resist a strong current of water and distinct from planktonic animals go where they wish. While giving a general idea of the dividing line between plankton and nekton, Haeckel's definition, which has played an important role in shaping our ideas about nekton today, no longer provides a sufficient basis for ecological and functional morphological investigations since it affords no possibility of quantitatively assessing either the boundary between plankton and nekton or that between nekton and other ecomorphological types of biont. Thus Parin (1968), proceeding from Haeckel's principle, believes that in the epipelagic zone of the ocean the minimum size of nektonic fishes with a well-developed capacity for active swimming may be between 15 and 30 cm, as fishes shorter than 15 cm are unable to counter oceanic currents. Meanwhile, young *Leucaspis leucaspis* (only 1.5 cm long) observed by this writer in ponds near Moscow proved capable of active horizontal migrations across the entire body of water, which, if Haeckel's definition is accepted, brings the border between planktonic and nektonic fish in this case to between 1.5 and 2.0 cm.

Principles of Paleontology David Raup, Steven M. Stanley, 1978-03-15 Presents principles of paleontology at an undergraduate level. Emphasizes theory and concepts over details of morphology and the fossil record. Profusely illustrated with photographs, charts, graphs, and tables.

Principles of Paleontology, 2e (PB) Raup; Stanley, 2004-02-01

Index of the Journal of Paleontology Richard D. Hoare, 1980-03 This is an index of Vols 26-50 of the *Journal of Paleontology*.
