The era of nanoscience and its technology has become increasingly important in last two decades and this encompasses a vast range of unimaginable applications for forthcoming decades Investigators are engaged in the manipulation of materials in the nano scale for studying their properties with making the desirable devices The range between 1 100 nm nm nanometer is generally considered as a nano scale and this scale is basically useful for measurement of the dimensions length or width or area or height of particles or constituents or atoms or molecules etc At this scale everything regardless of what it is has different properties to that of their bulk counterparts and these make nano so fascinating

Electrochemical Aptamer-Based Biosensors for Disease Biomarkers Masoud Negahdary, 2025-07-01 Electrochemical Aptamer Based Biosensors for Disease Biomarkers comprehensively presents the principles of designing aptamer based biosensors for disease detection using biomarkers The book considers the latest research and discusses the application of aptasensors design against different diseases In addition sections explore innovative types of electrochemical diagnostic techniques used based on various advanced elements and assemblies such as nanomaterials and signal transducers This is an effective practical guide for researchers to use as a reference for the development of their own laboratory research Covers the collection classification and comparison of recent research in the design of electrochemical aptasensors for the diagnosis of various diseases Presents reviews and compares all applied detection mechanisms in developed aptasensors Provides a practical guide for designing electrochemical aptasensors and showing how to select the optimal components in their design
