insurers policyholders and insurance intermediaries In some cases existing insurance regulations appear readily adaptable to the online world such as prohibitions on deceptive marketing of insurance products and unfair commercial practices which can be applied to advertising through social media such as Facebook and Twitter as well as to traditional written material In other areas current regulatory and business practices are proving to be inadequate to the task and new ones are emerging For example the insurance industry and insurance supervisors are exploring how to review utilize profit from and regulate the explosive growth of data mining and predictive analytics big data which threaten long standing privacy protection and insurance risk classification laws This book s ambitious international scope matches its topics The online insurance market is cross territorial and cross jurisdictional with insurers often operating internationally and as part of larger financial services holding companies The authors exploration of these issues from the vantage points of some of the world s largest insurance markets the U S Europe and Japan provides a comparative framework which is necessary for the understanding of online insurance
