**Amos Darko, Albert P C Chan**

## **Preparing A Building Service Life Plan For Green Buildings:**

**Preparing a Building Service Life Plan for Green Buildings** Dru Meadows, 2014-05-22 Expert guidance on developing a green building service life plan Filled with step by step instructions Preparing a Building Service Life Plan for Green Buildings explains how to create a framework for managing the performance requirements and life cycle impacts including end of life of major building elements for the duration of a green building s intended lifespan The book discusses operation and maintenance inspections and assessments repairs upgrades and replacements documentation and removal reuse recycling dismantling and end of life disposal of building components A customizable template for creating a comprehensive green BSLP is included in this practical resource Covers major building elements Standard foundations Slab on grade Basement walls Floor construction Roof construction Exterior walls Exterior windows and doors Roof coverings Interior partitions and doors Fittings Stair construction Wall floor and ceiling finishes Elevators and lifts Plumbing HVAC and electrical Fire protection Pedestrian paving Site development fences retaining walls fountains and other site improvements Storm sewer

**Developing A Body Of Knowledge For Green Construction Project Management** Amos Darko, Albert P C Chan, 2024-09-10 Growing global imperatives to address sustainability concerns have boosted the importance and prominence of green construction projects worldwide However project managers may lack the specialist knowledge and or technical skills to overcome the unique challenges to successfully deliver suitably sustainable green projects This book aims to address this shortfall by unearthing refining and synergising the hitherto scattered gems of experiential and theoretical knowledge into a unified Body of Knowledge for green construction project management Comprising both conceptual principles as well as practical case studies this book for the first time assembles structures and consolidates a comprehensive body of knowledge for green construction project management that addresses the unique aspects of this critical domain It will fulfil a now critical need equipping industry practitioners researchers and students with the core project management knowledge and skills needed to successfully deliver green construction projects It is a must read for anyone who seeks to develop core green construction project management knowledge and skills and those intending to move into green construction project management

**Life-Cycle Cost Models for Green Buildings** I.M. Chethana S. Illankoon, Vivian W. Y. Tam, Khoa N. Le, 2020-10-29 Life Cycle Cost Models for Green Buildings With Optimal Green Star Credits illustrates the tools and methods for developing a life cycle cost model that incorporates developer constraints while maximizing the number of credit points achieved The book identifies the interdependencies among various credits in the Green Star environmental rating system Afterwards life cycle cost is calculated by considering six main central business districts CBDs of Australia The net present value NPV technique is used to calculate life cycle costs Further a sensitivity analysis is also carried out for selected credits to identify the changes to life cycle cost to the changes in discount rate Once all the life cycle cost data is calculated this book illustrates the development of the proposed model using a Java application which allows users to

evaluate each key criterion of green buildings separately The book is designed to provide ample knowledge of the various options available to get green building certification and the further implications in terms of life cycle Provides cost saving and management advice for keeping a green building project operating on time and budget throughout their life cycle Expertly explains the various options available for gaining green building certification Allows users to build life cycle cost models which is unique to the project at hand

After Oil : A Comparative Analysis of Oil Heritage, Urban Transformations, and Resilience Paradigms Asma Mehan,2025-07-23 This book offers an academic analysis of the concept of heritage within the realm of oil related urban development It focuses on the term heritage with a specific emphasis on oil heritage exploring its varied implications for urban futures The book provides a nuanced understanding of heritage discussing its different interpretations and values across cultural and environmental contexts It examines the legacy of oil assessing its role and impact on societies It presents a balanced view acknowledging both the economic benefits of oil in urban growth and the environmental and socio economic issues it poses This approach places oil heritage within a broader heritage context critically evaluating its unique characteristics The book also investigates how various cultures perceive and engage with the idea of oil heritage It highlights the contrast between the political debates over oil in Western countries and the developmental challenges faced by emerging economies showcasing the global variance in the concept of oil heritage Additionally the narrative considers the changing role and meaning of oil over time reflecting on its historical importance and the challenges it poses for the future especially in transitioning to a post oil era Through its chapters the book provides a critical examination of the interplay between oil urban development and heritage studies It is designed to contribute to scholarly discourse in these areas targeting academics students policymakers and professionals interested in the intricate relationship between oil heritage and urban dynamics
