Spmg,1998-03-10 The Heinemann Mathematics scheme has been developed by the authors of the primary course SPMG with the aim of building on established strengths to provide a structured development of children s mathematical knowledge and skills within the revised curricula [The Singapore Mathematics Calendar 2021 \(Elementary\)](#) Yan Kow Cheong,2020-12-29 The Singapore Mathematics Calendar is a three book series Elementary Intermediate and Advanced that provides an informal yet creative way for both parents and homeschoolers to support their child succeed in math This math calendar is designed so that the answer to the problem on each day is the date on which the question appears The daily dose of both

routine and nonroutine questions aims to develop the child's problem solving and guesstimation skills while exposing them to valuable mathematical information that goes beyond their textbook. Hints and solutions are also provided for nonroutine or brain unfriendly questions. Moreover, each month begins with some elements of enrichment or recreational math to challenge or enrich the child. Through math activities, puzzles, and games, The Singapore Mathematics Calendar seeks to complement and supplement what the child is doing in school or at home by making math fun and educational. The Singapore Mathematics Calendar hopes to convey the message that mathematics needn't be drill and kill exercises; it can be fun yet challenging for students to be exposed to the beauty and joy of mathematics. If you're a parent who has decided to educate your children yourself, this book is the first you should buy. Washington Times. The Well-Trained Mind will instruct you step by step on how to give your child an academically rigorous, comprehensive education from preschool through high school, one that will train him or her to read, to think, to understand, to be well-rounded, and curious about learning. Veteran home educators Jessie Wise and Susan Wise Bauer outline the classical pattern of education called the trivium, which organizes learning around the maturing capacity of the child's mind and comprises three stages: the elementary school grammar stage, the middle school logic stage, and the high school rhetoric stage. Using this theory as your model, you'll be able to instruct your child in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude in those subjects. This newly revised edition contains completely updated ordering information for all curricula and books, new and expanded curricula recommendations, new material on using computers and distance learning resources, answers to common questions about home education, information about educational support groups, and advice on practical matters such as working with your local school board, preparing a high school transcript, and applying to colleges.
